Journal Edition

2007 Aviate Journal Edition contents

- 3 Foreword by the Director DASC
- 4 Giving Weight to a 'Just Culture' in Aviation
CDS discusses how we can go some way to lending strength to the Moral Component of Fighting Power, and therefore enhance our operational capability by addressing the 'Human Factor' in aviation
- 7 The Australian Aviation Safety Management System
An insight into the rationale behind Safety Management Systems (SMS) used by the Royal Australian Air Force
- 13 What IS the Question?
How we can use the thousands of pieces of Airprox data collected
- 16 Fatigue in Aviation
What measures, beyond those currently in use, can be taken to lessen the effects of the high levels of fatigue currently being experienced in the operational Middle East environment?
- 23 Management of Risk on Operations
CJHF (Afghanistan) discusses the relevance of Risk Management in a war-fighting scenario
- 27 Human Factors Training
An insight into the Human Factors Training provided by the DASC
- 30 'Lean' Transformation in an Aviation Environment
OC Tornado Lean Team describes how the Lean methodology is being used to tackle the cuts in funding
- 34 Common Aviation Standards on Operations
How Common Aviation Standards on operations can help to reduce the risk of accidents and incidents
- 38 UK Military Flying Training System
The new flying training system is the flagship programme of a new capability to meet the needs of a future fighting force
- 42 FOD
This article outlines key facets of Joint MoD FOD policy and highlights the achievements that have been made across the MoD demonstrating the effectiveness of a pro-active approach to FOD Prevention.

Important Flight Safety Information: please circulate quickly.
