Your BBC Your Say.

This leaflet was in my local library.
As a keen listener & reviewer, here are
my views on the questions that
interest me: -

1. I value most Radio 4 & BBC 2
for its variety and high standards.

2] About technology. please do
something about normal reception
on Radio 4. As one moves
about the room the reception
becomes distorted & one is always
having to retune. This occurs with
portable & 'plug in' radios.
This is more important than
new technology.

3] The BBC should NOT run
commercial services.

4] The licence fee is still the best way of funding the BBC & well as all your sales of Audio books & 'fill-in' products. & sale of programmes round the world.

Extra viewers.

lady presenters. They often 'gabble' their words & speak too quickly so that some information is hard to understand. One of the worst examples is

Francine Stock on Front Row
Please send her to speech training.

Finally. Thank you for many hours of pleasure from BBC Radio & terrestrial T.V.

U. M. B. Bell [ms]
