

N/B This is only a brief  
write up of PamPets, only  
Briefly looked at!

FRID 16 / APRIL / 2004

Dear Sirs,

I think so far its done alright  
with change in technology etc. the BBC!

As its furred as far as I can see  
from licence fees. that have slowly  
gone up!

The programmes are mainly centred  
around sport, a little bit of drama,  
the odd bit of technology programme,  
the occasional comedy (usually late at  
night). And early in the morning "films"  
that were produced before I was born!

Mainly B/W ones actually. Dont get me  
wrong, some are O.K. I've taped the odd  
one or two to watch later & perhaps save.

I do agree with the childrens programmes  
in a morning, these keep the children  
occupied while breakfast is over!

But (there's always a but!) the SF programs  
on or Not on at the moment is staggering!  
It went to "the NEXT generation - STAR TREK" & died

a death!

Dr who who came, I couldn't watch. I haven't & can't afford either a set box or satellite & there's not yet cable up here and most people I know didn't want to know!

What happened to "Tomorrows world" etc

I just got into "Tichmarsh" & he gives each "BASIC" "Now I only watch when there's something or "worth watching"!"

I do like "Documentaries", Horizon but that seems to show some weird things lately!

I did enjoy the programmes on "MARCONI" etc as I'm into electronics etc And I think it was "close to" what equipment he had then, as did "Baird" who invented T.V. (scanner etc).

I did look at the pamphlet you put out, that made me write this but some of the questions I want to see on.

I always thought the BBC was run by the government somehow but according to "BBC"

(3)

Charter review public consultation - Series  
BBC Your SAY! leaflet!

Its our BBC!

I also got another pamphlet "Directory" -  
Mediawatch - UK. and this tells you more  
about BBC etc.

Being a "christian" and these pamphlets come  
from church!

I feel there is a lot of "GARBAGE" on T.V.  
Now, a lot late on a lot that are  
influencing young minds into doing wrong  
things. And these young people, will grow  
up with these thoughts in their heads.

And its bad enough now with young people  
whats it going to be like later on!

All I'm saying it does effect everyone  
what you watch and listen too on Radio.

As you're also connected with this too!

I do listen probably to Radio just as  
much (possibly more than T.V.). Although

on occasion I do watch some live taped (to keep!) mainly comedy, Relegator, SF, fact & some educational programmes!

The Radio, I listen to Radio Sheffield being in that Area of Pickup!

But I've been listening to Radio York just lately (in LOFT!).

Licensing - why not do it like the mobile-phones - pay as you go!

Pay for what you actually watch!

The only thing wrong with this is, I suppose would be the price (as usual!).

The other alternative was to advertise on BBC. You do, advertise your programmes so you know how to do it!

I'd try & save up for a set top box but the programmes, really aren't worth watching?

I do get "Vouchers" for Radio times now & again, as I'd given up on it, as Terrestrial-T.V. seems to be going to the Dogs!

(5)

I put you the remaining bit of Vasher in  
just to see what you think of it!

Being on "income support" for approx 24 years,  
(Long term sick really), T.V. is the only  
entertainment I probably get, apart from  
Church!

And its usually secondhand T.V.'s we usually  
get too etc.

And the lady who I got these pamphlets off  
at Church doesn't have a T.V. at all, as some  
don't nowadays?

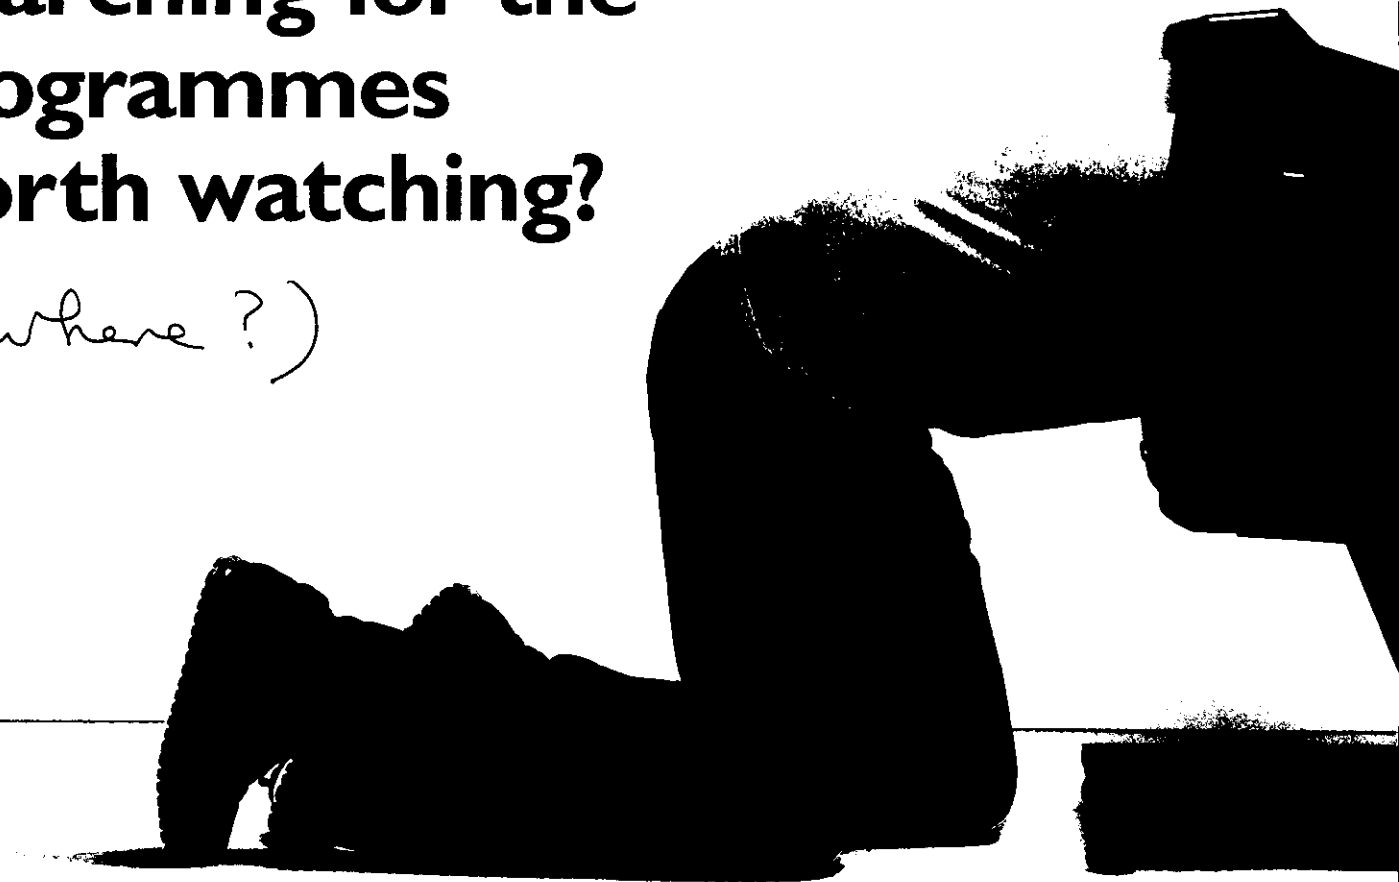

Well thats about it for now!

Hope it goes o.k.  
yours sincerely,

R. E. Daker

# Searching for the programmes worth watching?

*(where?)*

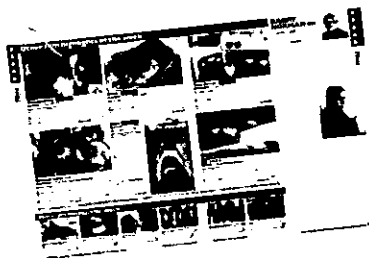

Open up Radio Times and the first thing you'll find is an at-a-glance round-up of the very best viewing for the week ahead.

Radio Times has so much more than listings. Every week, our journalists bring you exclusive behind-the-scenes interviews and features. We get closer to the stars and makers of the latest dramas, comedies, documentaries and other programmes to look out for. And Soap and Flannel takes a less than serious look at the week's key soap events.

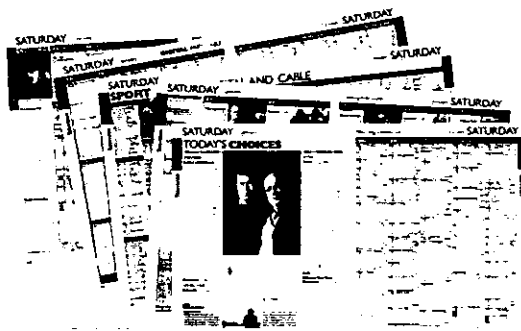

# Find them all inside Radio Times

You'll find there's a lot more on TV with Radio Times every week. And why not try it for a lot less with the vouchers opposite?

The week's must-see movies are reviewed in detail and rated by Andrew Collins. Also unmissable is Barry Norman's personal view of the most compelling stars and directors. And to complete the movie section, we bring you comprehensive coverage of the best films on every day, on every channel.

We give you 10 easy-to-use pages of TV and radio listings for every day of the week, including Freeview in detail and all the key digital and cable channels.

Alan's thoughts on the Great Outdoors appear every week, along with Phill Jupitus waxing lyrical about music and a scientist's view of what's on, delivered by Adam Hart-Davies.
