

YOUR BBC YOUR SAY

1. I value that the BBC is not reliant on commercial advertising for its main revenue. It should not be influenced by ~~or~~ Big Business. I value the standards given it by Lord Reith. I value the news nationally + locally and sports coverage that is not spoilt by commercial breaks. As it is the British Broadcasting Corporation I believe that its main purpose is to serve Britain and less to communities that are not British.
2. The BBC should avoid itself to all modern technology after all it introduced T/V to the world.
3. No opinion on the on line services. I believe that the BBC should limit its extension on additional stations and concentrate on the quality of the present ones.
4. I do not believe the BBC should run commercial services. The licence payer should have more consultation on this.
5. I agree with the licence fee as the best method of income and the only method.
6. I do not believe that the BBC is organised in the most effective and efficient way. The licence payer has little or no say in how the licence money is used or accounted for.
7. The BBC should be run by a publically elected body by licence payers and for licence payers.
8. A questionnaire and an opportunity for the licence payer to have a say should accompany the T/V reminder application and this should be taken into account by the publically elected body.
9. I am appalled by the lowering of standards of decency, bad language and taste over recent years. More wholesome programmes would be appreciated by the majority of viewers I believe.
