

10/3/04.

PPS. So who pays for us on
the Isle of Man to attend
a public meeting - or will
the BBC meet its public here
on the island?

Dear Sirs,

- I am writing to give feedback as the BBC as
requested. A/I value most - ① Dianas
- ② Links to educational programmes is Open University
Gardening Programs
Heritage.
- B) The BBC must ensure that all areas have access to
new technology in order to demonstrate equality +
fairness.
- C) Radio/online services should be optional but info on how to
access
- D) Yes - I've no problem provided the money is put
back into services
- E) The licence fee is out of date - add to rates
- F) In my area - No - we pay the same licence fee
but get little in the way of 'community voice'.
The only visit we get is the licence detector van!
- G) The Board of Governors should be a 'broad church'
incorporating places for users from each region
- rather like a University Senate. They could
interact here as live/video to reduce costs.
- H) Government should remain in control of this
valuable public service to ensure accountability.
- Additional Comment - BBC should ensure islands have
their own regional news ~~and~~ programmes - not as
add on to N/W. Our licence fee is not reduced for
inadequate local info or community activities
- Yours Sincerely Mrs Ravina A. Talbot
