

1-14-05

Dear Sir/Madam

I have complained on the phone also  
I have written to the B.B.C, about the  
background noise on most programs.

When you are trying to listen to  
the person talking the background,  
so called music, is interfering, especially  
when it does not stop when they are  
talking. It completely ruins the programs.

They say they keep monitoring the  
sound, but it does not change.

It is not only B.B.C Programs.

I had a hearing test the other week  
the gentleman was in mid 30s  
even he says it is annoying and  
he has perfect hearing.

Please try to get something done

Yours faithfully  
Graham Abbotson
