

Dear Sir or Madam.

I dont know if the BBBC Charter review can help, i hope so .Please please please can someone invent a button on the remote control to cut out background music when people are speaking.

Some^{OF} it isn't music, just a cacophon yof noise, programmes on television in general are getting noisier and noisier with shouting cchefs aand screaming and wolf whistling audiences.

i'm sick and tired of having to turn programmes off because of ~~of~~ choosing the gist of the plot or commentry^A

Yes my husband and i are oldies but ~~wife~~^{we are} not deaf and can hear perfectly any normal conversation.

Two programmes in point are the Saturday Lottery and the Weakest link, try listening to these programmes yourselves and see what you think

Yours faithfully

M & G. Parry
