## Introduction

This bibliography lists all the publicly available papers of which we are aware, that have made original use of the data from the Workplace Industrial Relations Surveys (WIRS) Series. This series includes Workplace Employee Relations Survey 1998, as well as previous Workplace Industrial Relations Surveys of 1980, 1984 and 1990. The bibliography also includes papers based on WIRS follow-up studies; these are indicated by [square brackets]. A final section lists major reviews of the original empirical work.

Seven types of publication are separately listed:

- 'Sourcebooks' reporting the primary analysis carried out by the research team for the sponsoring bodies
- Other books wholly based on data from the WIRS series
- Technical reports and methodological papers
- Journal articles and contributions to books, discussion papers, working papers and mimeos (arranged by year of publication)
- Doctoral theses
- Dissertations
- Reviews of WIRS results

This bibliography is periodically updated. Authors are invited to send a copy of any new or forthcoming publications to us so that the revised bibliography is as comprehensive as possible. Details of new work should be forwarded to:

John Forth
