ANNUAL REPORT 2005

Operation of the Chemical
Weapons Act 1996

Chemical Weapons Act 1996

Annual Report to Parliament on the Operation
of the Chemical Weapons Act 1996

*Presented to Parliament pursuant to section 33
of the Chemical Weapons Act 1996*

Ordered by the House of Commons to be printed on 20 July 2006

Annual Report on the Operation of the Chemical Weapons Act 1996

Section 33 of the Chemical Weapons Act 1996 requires the Secretary of State to prepare, each calendar year, a report on the operation of the Act, and to lay a copy of this report before each House of Parliament. This report provides information relating to provisions in the Act which ensure effective implementation of the Chemical Weapons Convention (CWC). The Act includes powers to obtain information required under the CWC from UK organisations, and to provide access to their sites for inspections by the Organisation for the Prohibition of Chemical Weapons (OPCW). In addition the Act requires anyone producing, possessing or using certain very toxic chemicals, listed on Schedule 1 of the CWC, to obtain a licence.

Declarations

The Chemical Weapons Convention has three Schedules. Schedule 1 chemicals are the most dangerous and therefore the most controlled, and have few peaceful uses. The chemicals listed in Schedules 2 and 3 are subject to fewer restrictions, and are often produced in large quantities for industrial purposes.

The Convention requires States Party to submit to the Organisation for the Prohibition of Chemical Weapons (OPCW) a range of annual declarations covering activities involving chemicals specified in these three Schedules. The declarations contain information concerning the production and use of these chemicals, broken down by Schedule, for the past year and that anticipated for the next year. Since 2004, additional information is provided in an aggregated form known as "Aggregate National Data". Information is also provided on a separate category of chemicals referred to in the Convention as Discrete Organic Chemicals (DOCs)¹.

The declarations draw on information submitted by UK industry, academic and government organisations and are provided to the OPCW according to the following timetable:

DECLARATION	TIMING
Annual Past Declaration covering Schedule 1,2,3 chemicals, including Aggregate National Data, and Discrete Organic Chemicals	No more than 90 days after the end of the calendar year
Annual Anticipated Declaration for Schedule 1 Chemicals	No less than 90 days before the beginning of the calendar year
Annual Anticipated Declaration for Schedule 2 and 3 Chemicals	No less than 60 days before the beginning of the calendar year

¹ Chemicals belonging to a class of chemical compounds consisting of all compounds of carbon, except for its oxides, sulphides and metal carbonates. Although DOCs are not included in the Schedules, plant sites producing DOCs are subject to verification if they produce more than 200 tonnes annually (or 30 tonnes if they contain the elements phosphorus, sulphur or fluorine).

The CWC also requires States Party to provide information on any old chemical weapons² found or destroyed on their territories (including a plan for future destruction) according to the following timetable:

DECLARATION	TIMING
Annual Plan for the Destruction	No less than 60 days before the end of the calendar year
Annual Report on Destruction	No more than 60 days after the end of the calendar year
Ad Hoc Declarations of New Finds	Within 180 days of discovery

Two further reports are also required annually: on activities at former chemical weapons production facilities approved by the OPCW for conversion for use for purposes not prohibited under the CWC; and on defence programmes for protection against chemical weapons.

The UK CWC National Authority, part of DTI, is responsible for implementing the CWC in the UK. It collects information required for the above declarations from relevant UK organisations. Guidance notes and declaration forms for completion are circulated electronically, with paper copies being available on request. Forms are also available on the National Authority's website (www.dti.gov.uk/europeandtrade/non-proliferation/chemical-biological/uk-cwc/page24828.html).

The numbers of UK organisations making declarations in each category in each year since the CWC entered into force are:

	1997	1998	1999	2000	2001	2002	2003	2004	2005
Schedule 1	2	2	2	2	2	2	2	2	2
Schedule 2	9	9	8	7	10	10	10	11	14
Schedule 3	11	14	12	12	11	11	12	12	10
Discrete Organic Chemicals	132	153	151	142	140	141	131	142	134
Aggregate National Data	n/a	n/a	n/a	n/a	n/a	n/a	n/a	281	279

² Chemical weapons that were produced before 1925, or chemical weapons produced between 1925 and 1946, that have deteriorated to such an extent that they can no longer be used as chemical weapons.

The UK's Annual Past Declaration for 2004 was sent to the OPCW on 21 March 2005. In addition to activities involving scheduled chemicals and Discrete Organic Chemicals, the declaration reported on activities at converted former Chemical Weapons Production Facilities at Nancekuke (Cornwall), Randle (Cheshire) and Rhydymwyn (North Wales), and provided information on the UK's chemical defence programme in 2004.

The Annual Anticipated Declaration for 2006 for Schedule 1 facilities was sent to the OPCW on 24 August 2005. That for Schedule 2 and Schedule 3 sites was sent on 11 October 2005.

For Old Chemical Weapons, the UK submitted a report on completed destruction during 2004; 3 reports of new finds; and a plan for their destruction during 2006. The UK also submitted, on a voluntary basis, a report on all stocks of Old Chemical Weapons as at 31 December 2005.

Inspections

Each year the OPCW undertakes routine inspections of selected declared sites to verify the declarations submitted by States Party. The UK received a total of 8 such inspections in 2005: 2 at Schedule 1 facilities; 1 at a Schedule 2 industrial site; 1 at a Schedule 3 industrial site; 1 at a Discrete Organic Chemicals industrial site; 1 at the Old Chemical Weapons storage and destruction facilities at Dstl Porton Down; and 2 at former Chemical Weapons Production Facilities. All the sites were acknowledged by the OPCW to have provided first-class co-operation, and all the inspections were completed without incident.

The number of OPCW inspections undertaken in the UK, by category, since the CWC entered into force is:

	1997	1998	1999	2000	2001	2002	2003	2004	2005
Schedule 1	2	1	1	2	2	1	1	0	2
Schedule 2	0	4	4	0	2	2	2	2	1
Schedule 3	0	1	0	1	1	2	0	0	1
DOC	0	0	0	0	0	0	1	4	1
CWPF	8	5	3	3	0	1	1	0	2
OCW	2	1	1	1	0	1	1	1	1

Licensing and Trade Controls

The Act contains provisions to control Schedule 1 chemical production, possession and use through the issue of licences. These controls, together with separate import and export licensing requirements implemented under the Import of Goods (Control) Order 1954 and the Export Control Act 2002 respectively, aim to ensure that quantities of Schedule 1 chemicals acquired or possessed by the UK do not exceed the 1 tonne ceiling specified in the CWC; that the chemicals are used only for purposes not prohibited by the CWC; and that the CWC's conditions on transfers are met. Licence holders are required to report annual usage and any changes of circumstance to the UK CWC National Authority.

An Open General Licence permits those registered under it to produce, possess or use an aggregate total of 5 grammes or less of any Schedule 1 chemical for pharmaceutical, medical or research purposes in any calendar year. 25 organisations operated under the Open General Licence during 2005, the same as in the previous year.

An Individual Production, or Possession and Use, Licence is required to produce, or possess or use, more than 5 grammes of a Schedule 1 chemical. 3 Individual Production Licences and 7 Individual Possession and Use Licences were issued for 2005.
