EIB's Energy objectives for 2007-2009

To promote;

- Renewable energy (RE)
- Energy efficiency (EE)
- Research, development and innovation (RDI) in energy
- Security and diversification of internal supply (including TENs-E)
- External energy security and economic development (Neighbour and Partner Countries).

EIB and CCS

EIB is working with the Commission on the Zero Emissions Power Technology Platform (ZEP) and is actively involved in both the Demonstration Projects Taskforce and the Task Force on Policy and Regulation.

EIB is interested in financing RDI components of clean coal technologies as well as providing finance to CCS demonstration plants.

EIB will be interested in participating in the funding of projects which will be shortlisted as a result of this competition.
