

SEVERN TIDAL POWER FEASIBILITY STUDY REGIONAL FORUM TERMS OF REFERENCE

Objectives:

- To ensure that local and regional economic, social, planning and environmental impacts of a Severn tidal power scheme are fully considered within the feasibility study
- To promote local and regional stakeholder and public engagement

Specifically:

- To advise on the local and regional issues to be considered in the feasibility study, to contribute to the evidence base and analysis of the evidence
- To advise on how best to assess the impact on communities, other social impacts, and on spatial planning issues that should be factored into the study
- To advise on local and regional stakeholders and public who should be engaged in the feasibility study and how, to support that engagement locally and to advise on communications issues
- To help communicate the process and progress of the feasibility study to the community and the views of the community to the feasibility study team.
