

Notice to Importers 2773 issued on 8 January 2009 by Import Licensing Branch (ILB),
Queensway House, West Precinct, Billingham TS23 2NF (last revised 14 April 2009)

IMPORTS OF IRON & STEEL – 2009 Import Licensing Arrangements

This Notice sets out the licensing arrangements for the year 2009 for certain iron and steel products subject to prior surveillance or quantitative import restrictions (quotas). It replaces Notice to Importers 2763.

2. The table attached to this notice indicates the iron and steel that requires an import licence on entry into free circulation. For goods subject to quotas (please refer to Section B of this notice) a certificate of origin is also required.

These import licensing arrangements do not apply to goods not entered into free circulation. That is, goods that are imported but entered to customs warehousing, temporary importation or inward processing relief may be imported under the authority of the Open General Import Licence. If such goods are subsequently entered into free circulation the import licensing requirements set out below will apply.

CHANGES TO TARIFF CLASSIFICATION

3. Changes to commodity codes do occur from time to time. When changes occur the current electronic version of this Notice will be updated. The latest changes will appear in bold in the table. Importers who are unsure of the classification of their goods should contact the HM Revenue and Customs (HMRC) Product Classification Helpline on 01702 366077 or see under 'Classifying your goods' at the following page of the Business Link website:

<http://www.businesslink.gov.uk/bdotg/action/layer?topicId=1079717544&r.lc=en&r.s=tl>

LICENSING ARRANGEMENTS

4. The table at the end of this Notice lists the commodity codes for certain iron and steel products and indicates whether an import licence is required under:

- A) Prior Surveillance (1)
- B) Quantitative Import Restrictions (quotas) (2)

An entry marked with an "X" shows that, according to country of origin, no individual import licence is required.

Applications to ILB should be made as follows:

A) PRIOR SURVEILLANCE

5. Products against which (1) appears in the table require a prior surveillance import licence. These will be issued without restriction. To apply importers should complete form ILB/W, giving the full 10-digit commodity code, and submit it together with:

- (a) the third-country consignor's name and address and
- (b) a copy of the contract of sale or purchase and the pro forma invoice and in cases where the goods are not directly purchased in the country of production, a certificate of production issued by the producing steel mill.

An import with a net weight of 2500 kilogrammes (2.5 metric tonnes) or less does not need a prior surveillance import licence.

The European Community has authorised prior surveillance import licensing until the end of December 2009.

Data on prior surveillance licences issued for iron and steel is available from the European Commission online. The data can be accessed by clicking on 'Statistical Information' in the paragraph on Prior Surveillance at the following address:

http://ec.europa.eu/comm/trade/issues/sectoral/industry/steel/index_en.htm

B) QUANTITATIVE RESTRICTIONS (QUOTAS)

6. The coverage of each quota category is indicated in the Tables below by SA1 for coils, SA2 for heavy plate, etc. Import licences will be automatically issued subject to quota availability and satisfactory application. Should a country accede to the World Trade Organisation (WTO) during 2009 the quotas against that country will be removed.

Russian Federation

7. During the period 1 January to 31 December 2009 exports of steel products originating in the Russian Federation which are to be cleared into the European Community (EC), against which (2) appears in the table, will be subject to quantitative limits. Importers should complete form ILB/W and submit it together with:

- (a) a valid 2009 export licence issued by the appropriate authorities in the Russian Federation and
- (b) a copy of the bill of lading and of the purchase contract.

8. The 2009 quotas in tonnes for the Russian Federation are:

SA. Flat Products	Russian Federation
1. Coils	1,060 875
2. Heavy plate	281 875
3. Other flat products	609 875
4. Alloyed products	107 625
5. Alloyed quarto plates	25 625
6. Alloyed cold rolled and coated sheets,	112 750

SB. Long Products

1. Beams	56 375
2. Wire rod	332 100
3. Other long Products	519 675

Kazakhstan

9. The Agreement between the EC and Kazakhstan expired on 31 December 2006. Pending the signature and entry into force of a new Agreement it is necessary to provide a regime which establishes quantitative limits and has similar provision.

10. During the period 1 January to 31 December 2009 exports of steel products originating in Kazakhstan which are to be cleared into the EC, against which (2) appears in the table, will be subject to quotas. Importers should complete form ILB/W and submit it together with:

- (a) a valid 2009 export licence issued by the appropriate authorities in Kazakhstan and
- (b) a copy of the bill of lading and of the purchase contract.

11. The 2009 quotas in tonnes for Kazakhstan are:

SA. Flat Products	Kazakhstan
1. Coils	87,125
2. Heavy plate	0
3. Other flat products	117,875

12. Up to date information on utilisation of these quotas can be obtained at <http://trade.ec.europa.eu/sigl/> or by contacting ILB.

PRESENTATION OF EXPORT LICENCES

13. The importer must present the export licence no later than 31 March 2010 .

WHERE TO APPLY

14. Importers may apply to any Member State for an import licence. ILB is the competent licensing authority for the UK and the address is given above. Applications for an import licence (form ILB/W) are available on request. The application form is also available on the BERR website at:

<http://www.berr.gov.uk/europeandtrade/importing-into-uk/import-licensing/Import%20Licensing%20%20Forms/page22849.html>

Should importers wish to apply elsewhere a list of all competent authorities throughout the EC is available from ILB.

EURO VALUE

15. Importers should note that when completing form ILB/W for a prior surveillance licence, a CIF value in euros must be given. From 1 January 2009 the conversion rate is 1 euro = £0.7903 or £1 = 1.27 euro when converting from sterling. If converting from any other currency the conversion has first to be made into sterling using the rate shown on the HMRC website:

<http://www.hmrc.gov.uk/exrate/> which determines value for duty purposes and then using the exchange rate above.

VALIDITY OF IMPORT LICENCES

16. All import licences will have an initial validity of four months from the date of issue and may be renewed for a further four months. For surveillance goods, if it is found that the unit price and/or the net weight of the importation exceeds the quantities stated on the licence by less than 5% this shall not preclude the release for free circulation of the products in question.

17. For import licences issued under quotas the goods must be shipped from the originating country by 31 December 2009. Shipment is considered to have taken place when the goods are loaded onto the exporting aircraft, vehicle or vessel.

USE OF ELECTRONIC IMPORT LICENCES ON CHIEF

18. The following information needs to be entered on CHIEF when entering iron and steel for which an import licence is required. This information is set out in the table below:

	Document Code	Status Code	Document Reference
All steel prior surveillance licensing of more than 2,500 kgs	I004	Use one of the following codes AE, AP, EA, EE, EL, EP, ES, GE, LE, LP, UE, XF, XU	GBAOG followed by licence number
All steel prior surveillance of 2,500 kgs or less, i.e. no import licence needed	I004	XB	GBAOG ¹
Quota – Russian Federation	L113	Use one of the following codes: AE, AP, EA, EE, EL, EP, ES	GBAOG followed by licence number
Quota – Kazakhstan	L114	Use one of the following codes: AE, AP, EA, EE, EL, EP, ES	GBAOG followed by licence number

¹ There is no need to enter an import licence number

19. Electronic licences are only valid for use in the UK. If the importer intends to clear the goods into another Member State ILB will issue a paper licence. For this reason, applicants should state on the application form whether the goods are to be cleared in the UK or elsewhere in the EC.

WARNING

20. Surveillance import licences may only be used whilst surveillance arrangements remain in force. If surveillance measures are replaced by quotas any valid surveillance licences will be revoked upon entry into force of the respective quotas.
