Dear Colleague,

Thank you for registering for the **Advanced Crowd Dynamics** course. This course is for people who have completed the **Crowd Dynamics** course or have equivalent practical experience. It is for those who design for, plan or manage the movement of people in sport, entertainment, shopping, transport and similar environments.

In order to get the most out of the course please read the information below and prepare for the course as suggested.

1. **What to do now:** review the events for which you are responsible and the work you have completed during and since attending **Crowd Dynamics**, if appropriate. Ensure you have a basic understanding of MS Excel.
2. **What to bring to the course:** you **MUST** bring a laptop with MS Excel installed. You should also bring information relating to your own crowd dynamics issues – such as plans, site maps and related data. This will allow the course to focus on your own current challenges and projects, and create solutions that can be applied back in the workplace.
3. **How the course is delivered:** the course will be based around presentations followed by group and individual exercises that will help you apply the concepts to your own situation. The emphasis at the College is on highly interactive courses and you will be encouraged to share experiences, ask questions and explore issues in the interests of you own learning and that of other delegates.

Please do not hesitate to contact our learning support team if you have any queries. We look forward to seeing you at the college.

Yours faithfully

Learning Support Manager
