Dear Colleague

Thank you for registering for the **Risk Management for Civil Protection** course. This course will provide you with a firm understanding of risk management in a civil protection context, covering the statutory duty, multi-agency collaboration, risk registers, control measures and communication strategies.

We would normally expect delegates on this course to be familiar with the requirements of the Civil Contingencies Act (2004) or to have completed the **Introduction to Civil Protection** course.

In order to get the most out of the course please read the information below and prepare for the course as suggested

1. **What to do now:** for those of you who are new to Civil Protection, or indeed those who may need a refresher before coming on a course, please go to our Civil Protection pre-course work link and read the information provided.
2. **What to bring to the course:** delegates are encouraged to bring a copy of their LRF Community Risk Register. In addition any further publications from your organisation, internal or public, that focus on risk assessment and communication and wider risk management issues would be useful to review and reflect upon during the course.
3. **How the course is delivered:** the course will be based around presentations followed by group and individual exercises that will help you apply the concepts to your own situation. The emphasis at the College is on highly interactive courses and you will be encouraged to share experiences, ask questions and explore issues in the interests of you own learning and that of other delegates.

Please do not hesitate to contact our learning support team if you have any queries.
We look forward to seeing you at the college.

Yours faithfully

Learning Support Manager
