

15 August 2007

I have read news of the potential effect on my local airport (Durham Tees Valley) with dismay.

BMI run a good service to Heathrow from DTV, and this area has a huge chemical industry which should have a local airport that can link to the nation's capital. I have used this myself, and it will be a huge irony if as a result of these proposals I can fly direct to Amsterdam, but not to my nation's capital city.

I would like to add my voice to the many who will be asking you to request the CAA to rethink these disastrous charges.
