

As a regular listener to Warminster Community Radio (WCR) on line, it would be great if I could tune in regularly on fm to hear my favourite programs. The local radio station with the present franchise (3TRfm) is not my cup of tea at all as it just seems to blast out noisy music in between adverts whereas the volunteers on WCR keep me fully advised of local issues and play a good variety of music which I enjoy. I would fully support any permitted broadcasts (without constant advertising!) by WCR which I feel could run alongside broadcasts from 3TRfm without affecting the listening figures of the latter.

A change in the Community Radio framework is overdue and Article 47 should be adopted to enable small concerns such as WCR to hold a full broadcasting licence.

Thank you

Mr R Maynard
