

Sustainability Appraisal

Debbie Corbett

The MOD has to undertake Sustainability Appraisals (SA) on all new projects. This is a risk management tool, highlighting issues that could delay projects or requirements for further Environmental work, providing an audit trail, and supporting the Planning process. Incorporating the fifteen themes covered in the 'Sustainability Appraisal Handbook - for the MOD Estate', this SA case study is based on a fictitious proposal to build a visitor centre for the Army on 'Falsebury' Plain, a Military Training Area.
