

CBI Response to DTI Consultation on electronic Commerce (EC Directive) Regulations 2002

The CBI considers implementation of the e-Commerce Directive in the UK to be a matter of major importance in the development of the UK as the best place in the world to do e-commerce.

The CBI is concerned about aspects of the government's proposed legislation implementing the directive. These concerns are fully covered in the submission that we are making jointly with the Alliance for Electronic Business (AEB).

Dr. Jeremy Beale
Head, e-Business
CBI
