

**Mean Wave Power
(kW / m of wave crest)**

Land
 UK Continental Shelf & Channel Island
 Territorial Sea Limit

Annual Mean Wave Power South West Area of UK

Projection Transverse Mercator
WGS 1984 UTM Zone 31 N

Scale 1:2,500,000
when printed A3

dti

Atlas of UK Marine Renewable Energy Resources

Notes

1. South of 63° N and East of 12° W, model cell size approximately 12km. Model cell size approximately 60km in all other areas.
2. Model accuracy is less robust in areas closer than 12km to land.
3. Wave model based on hourly predictions throughout three years.
4. Wave power is calculated for each horizontal metre of wave crest using the energy period calculation (T_E).
