Income After Housing Costs	(+10 to +22)	37	39	32	27	25	24	23	23	28	26	29

Percentage change	Source: Family Resources Survey					
	Quintile group medians					Population mean
	Quintile 1	Quintile 2	Quintile 3 (Population median)	Quintile 4	Quintile 5	
1994/5-2004/05						
Income Before Housing Costs	25	28	24	21	22	25
Income After Housing Costs	37	41	32	29	31	35
1996/7-2004/05						
Income Before Housing Costs	21	23	19	17	17	21
Income After Housing Costs	31	36	26	24	24	29

Notes:

1. Due to sampling variation, estimates in brackets () are uncertain; see Appendix 2.
2. Where figures are **particularly** uncertain the 95% confidence interval is quoted. It is 95% probable that these ranges, derived from the sample data, will encompass the population figure that is being estimated.
3. Unless figures are marked in **bold type**, they do not show change that is statistically significant, at the 95% level, when compared to the majority of other figures in the same row.

Gini coefficient (per cent)	33	33	34	35	34	35	35	34	34	34

Notes:

1. These estimates should be treated with caution as they are unlikely to be accurate to the degree of precision quoted.
2. Results for the bottom 10 per cent of reported incomes (italicised in the above table) are particularly vulnerable to income measurement problems and have limited validity as a guide to consumption capabilities of the poorest 10 per cent of individuals. They are also affected by the presence of negative incomes on the AHC measure.
3. Results for the top 10 per cent of reported incomes (italicised in the above table) are particularly vulnerable to sampling errors and income measurement problems. Her Majesty's Revenue and Customs statistics are likely to provide a better guide to incomes at the top end of the income distribution.

All individuals (per cent)	37	41	32	29	31	35	

Notes:

- From one year to the next, certain results may be volatile. Therefore, year-on-year comparisons should be treated with caution.
- Due to sampling variation, estimates in brackets () are particularly uncertain; see Appendix 2.
- Where figures are particularly uncertain the 95% confidence interval is quoted (ie it is 95% probable that these ranges, derived from the sample data, will encompass the population figure that is being estimated).
- Differences between estimates for real-terms change in incomes by quintile and family type are not statistically significant at the 95% level unless:
 - They are in *orange italic* type, in which case differences between this figure and the majority of other figures in the same column (i.e. across family types) are statistically significant at the 95% level.
 - They are in **bold** type, in which case differences between this figure and the majority of other figures in the same row (i.e. within family types) are statistically significant at the 95% level.
- Abbreviations for **full-time** and **part-time** have been used in these supplementary tables. The abbreviations used are FT and PT, respectively. For full definitions of these terms, see Appendix 1.

HBAI Supplementary Tables

Single 2 children aged 5 and 11	142	149	153	159	164	173	181	186	187	191

Notes:

This table takes levels of equivalised income for the population as a whole and translates them into cash equivalents for a selection of family types. For example, for results Before Housing Costs, it shows that 60 per cent of median (equivalised) income in 2004/05 was £210 per week for a couple with no children. This implies that a single person with no children needs a cash income of £128 or less to be below 60 per cent of median (equivalised) income for the population as a whole.

Notes:

- Small changes in estimates from year to year, particularly at the bottom of the income distribution, may not be significant in view of data uncertainties; see Appendix 2.
- FES figures are for the United Kingdom, FRS figures are for Great Britain. The reference period for FRS figures is single financial years. FES figures are single calendar years from 1979-87, two combined calendar years from 1988/89-1992/93 and two financial years combined from 1993/95-1995/97.
