

## INVEST TO SAVE BUDGET – ROUND 3 WINNERS:

Lead Partner	Description of Project	Value £'000s
<b>Central Government-led Projects:</b>		
Cabinet Office	To effect, through e-learning, an exchange of competences and skills between public and voluntary sectors to enable users of the latter's services to play a full part in building and sustaining community based services and partnerships.	100
Department for Culture, Media & Sport - British Library	To create an online resource for teaching Citizenship, a compulsory National Curriculum subject, in secondary schools from September 2002.	312
Department for Culture, Media & Sport - Sport England	Innovative interactive pilot scheme aimed at utilising sport via the internet as a key inclusion vehicle to support the work of key agencies working with disaffected and socially excluded young people	137
Department of Social Security	A two-year project offering, via interactive Digital Television (iDTV), a range of social security services to customers over pension age and to people who are planning for their retirement.	1,875
Department of Social Security	Publication of a benefit and tax credit calculator and associated tutorial on the DSS website for use by Voluntary Sector Advisors and Citizens	514
Department of Social Security	Piloting the introduction of video technology into selected social security tribunal venues, Appeals Service regional centres and First Tier Agency offices.	100
Department of Social Security	By installing internet enabled PCs and document imaging processing equipment in public, customers will be able to contact DSS and local authorities by email and have evidence, replies etc. scanned and sent electronically to the appropriate body.	95
Department of the Environment, Transport & the Regions	The project will develop an electronic interface for the use of all local authorities in England to facilitate the electronic transfer of data thereby facilitating all applications to and decisions from the Rent Service to be conducted electronically.	1,763
Department of the Environment, Transport & the Regions	To improve future Met Office forecasts of pollution levels in and around urban environments and thereby provide early warning to vulnerable sections of the community whilst permitting healthcare services to prepare for increased demand.	782
Department of the Environment, Transport & the Regions	To provide an interactive database and web-site, to create a one stop shop for the purchase of navigation licences and access to relevant inland waterways information.	300

Department of the Environment, Transport & the Regions	The development of an interactive electronic risk assessment tool and practical control advice to help firms manage the health, safety and environmental risks from chemicals.	250
Department of the Environment, Transport & the Regions	Health & Safety Executive in partnership with the Environment Agency and the Scottish Environmental Protection Agency will develop a web based information system supporting Control of Major Accident Hazard Regulations and allowing public access to data on hazardous sites.	200
Department of the Environment, Transport & the Regions	Pilot project to gather electronic height data and to develop signal-processing algorithms to produce an enhanced electronic terrain height model.	100
Department of Trade & Industry	The development of facilities to enable exporters apply for Export Licences over the Internet and do away with the need for supporting documents to be submitted in paper form.	1,458
Department of Trade & Industry	To run pilot projects in Birmingham, Cornwall and Fife to provide: debt advice through a telephone helpline; signposting to existing local agencies where face to face advice is required; access to payment disbursement systems for clients.	1,000
Department of Trade & Industry	Creation of a single gateway to provide information about biotechnology to the public and deliver services to biotechnology companies.	500
Department of Trade & Industry	Metrology Connect is a project which aims to bring together current communication developments in the field of legal metrology (weights and measures) in central and local government to establish a single network for communication and the distribution of information.	111
Department of Trade & Industry	A video conferencing pilot between a Court and an Official Receiver's Office. OR will test the take up by bankrupts of interviews and advice offered via a live video link with the court.	50
Department for Education & Employment	Project to create a one stop shop where all of Hull's citizens can have their ability and potential assessed, receive encouragement, guidance and mentoring, and tailored advice, including career options.	496
Department for Education & Employment	To improve communication between parents, children, schools and the agencies they are involved with by facilitating the provision of an entirely free Internet Service Provider (ISP) and an advanced Web Portal.	295
Department for Education & Employment	The proposal is to establish a learning management system for Tameside learners. It uses an internet site with fast connections to colleges.	245
Department for Education &	An early diagnostic tool for childhood dyslexia enabling advanced military technology to be applied	100

Employment	to educational screening for recognised behaviours.	
Department for Education & Employment	To establish and oversee a web site which will provide an interesting, interactive debating chamber for children, staff and police to exchange views on chosen aspects of Citizenship. To enable children to respect themselves, other's values and beliefs and the environment.	100
Department for Education & Employment	This programme comprises a number of interfaced projects which will redesign the existing traditional, paper-based marking and data capture processes to produce a redesigned model involving electronic imaging, marking and direct data capture.	2,838
HM Customs & Excise	Pilot project to investigate the use of radar and other sensors to provide an all weather capability for surveillance aimed at curbing the movement of drugs into the UK.	100
Home Office	To explore the services the police and criminal justice organisations should provide on-line and then establish a national internet portal to linked police force websites, with possibilities of links to other Criminal Justice System players. The service will be publicised to ensure benefits are fully realised.	3,970
Home Office	This project will develop two Short-Term Offender Programmes (STOP) aimed at problems associated with imprisonment – homelessness, unemployment, financial difficulties, drug and alcohol abuse - carried out during custody and after release to reduce re-offending rates.	2,289
Home Office	To set up video links between youth offending teams and custodial units in the juvenile sector to increase contact between young people and reduce the amount of time spent travelling to and from secure establishments.	1,149
Home Office	The projects will employ restorative justice techniques with victims and offenders to address street robbery and bullying among school children in London schools where these problems are common.	811
Home Office	To develop a comprehensive pool of information on equalities, particularly aimed at members of the public, to improve and extend the quality and range of information given on equality issues.	763
Home Office	Delivery of Web oriented modular substance misuse training, for communities and a wide range of professionals, ensuring a sustainable pool of trained people/professionals who will be recruited/'up skilled' for drug treatment agencies.	754

Home Office	The Domestic Violence Partnership Project will test out its effectiveness as a multi-agency approach in enabling victims to prevent further repeat assaults. This innovative idea places a DV Officer alongside Police in Plaistow Community Safety Unit to target short and long term interventions to victims.	427
Home Office	Pilot fingerprint based ID and verification service to electronically validate individuals from arrest to release.	198
Home Office	Pilot study for data sharing between agencies to enhance targeting of services to vulnerable groups.	115
Home Office: Avon & Somerset Police	Local provision of online policing, providing facilities to improve reporting of crime, public information and service delivery to the public.	459
Home Office: Cleveland Fire Brigade	The initiative's aim is to reduce arson attacks in co-action with community needs, sensitive application and financial resources. Action for reduction revolves around four evolving strands: prevention, education, investigation/detection and electronic information exchange.	83
Home Office: Criminal Case Review Commission	The project will implement GSI links in both the Commission and the Court of Appeal to enable files and other information to be accessed and transferred electronically. The project can be developed further by both parties and can be extended to other public bodies.	371
Home Office: Data Protection Commission	Combined approach to identifying agencies who procure personal information by deception from data custodians.	100
Home Office: Dyfed-Powys Police	Intelligence led network of agencies to identify vulnerable citizens and property and reduce crime in the local area.	325
Home Office: Leicestershire Police	Developing common referral systems between landlords, police and other service providers for serious cases of anti social behaviour, reducing tenancy turnover; the number of void properties; and the number of serious anti social behaviour cases.	195
Home Office: Merseyside Police	To utilise a partnership approach to identify truants and to carry out intervention work. The project will concentrate on the causes of truancy - bullying, educational underachievement, psychological disorders, lack of parental supervision, peer pressure - and will consider the social impact it has and put into place potential remedies.	99
Home Office: Merseyside Probation	An evaluation of current data and management information concerning alcohol related crime in the Liverpool City Police district. An agreed new system for recording such crime across agencies which informs: future joint policy development; policing and licensing decisions; joint commissioning decisions to	70

	invest and develop alcohol services; and improves public safety.	
Home Office: Norfolk Constabulary	This project seeks to establish a mobile contact facility that will take public services to the customer. Services include higher profile policing in rural areas; access to benefits advice and services; outreach service to asylum seekers; and general advice from Citizens Advice Bureau.	79
Home Office: Northumbria Police	Local project to build and provide interactive policing services via the Internet, which are customer focused, socially inclusive, easy to use and cost effective. These services will support existing police availability and provide opportunities to save money through front and back office process improvements.	543
Inland Revenue	Introduction of an electronic NINO tracing and verification process to speed up contact between employer and Inland Revenue when new employee starts work. Will prevent fraud.	489
Lord Chancellor's Department	To provide consultancy to support the introduction of guidelines relating to the architecture and quality of websites providing legal information and advice to the public.	98
Ministry of Agriculture, Fisheries & Food	A joint project to develop standards and digital resources for fishing vessel navigation	300
Ministry of Agriculture, Fisheries & Food	This project aims to provide for the administration of the scheme to control the use and discharge of offshore chemicals by the oil and gas industry within UK waters to be changed to a completely electronic format. Includes an interactive website giving 'hazard ranking' of such chemicals.	195
Ministry of Agriculture, Fisheries & Food	The establishment of a 'joint marine consents unit' to serve as a single point of application for consents from both DETR & MAFF Departments simultaneously on one application form for a range of marine works	100
Ministry of Agriculture, Fisheries & Food	Development of a process model and pilot system to support the electronic delivery of legally admissible regulatory end-products for pesticides.	100
Ministry of Defence	Skill Force is an innovative project which uses retired military instructors to provide Key Skills training to young people aged 14-16 in schools. The aim is to enhance their achievements in school and subsequent employment prospects.	1,500

Ministry of Defence	The project will use existing NHS data to develop an operational workload forecasting system based on latest Met Office forecast technology, improving cost-effectiveness and efficiency. The model will predict variations in NHS emergency workload, with forecasts delivered electronically to NHS emergency services	1,139
Ministry of Defence	To provide a secure internet based e-Trade Exchange for the effective disposal and marketing of surplus equipment, and for handling waste, across the public sector.	820
Office of Fair Trading	To develop an electronic system with public and private areas containing database and text elements to support the work of OFT and other regulatory bodies under the Unfair Terms in Consumer Contracts Regulations 1999, and other legislative areas where powers are shared.	1,453
Office of Fair Trading	A secure website providing OFT and seven sector regulators with a knowledge base and facilities for information exchange relating to Competition Act 1998	98
Ordnance Survey	The project's aim is to enable the integration of terrestrial and marine topographic data held by BGS, OS, and UKHO, so that this can be accessed readily by users, to satisfy diverse coastal zone applications and services.	450
<b>Health-led Projects:</b>		
Ashfield Primary Care Group	Development of electronic medical records, web based advice, and role of a Service Advisor, in order to provide necessary infrastructure for a range of approaches supporting patient independence.	390
Barking & Havering Health Authority	A pilot shared-access electronic register of young people who self-harm. The aims are to facilitate joint working between health and social services, to improve the quality, effectiveness and value for money of assessment and care services to this group of vulnerable young people.	80
Barnet Health Authority	Aim of project is to provide patients and families with direct and electronic access to advice, information and support in order to help resolve and deal with underlying social causes or consequences of medical conditions.	91
Brent & Harrow Health Authority	To develop an information and interactive web site to provide advice and guidance on drug and alcohol related issues to the residents of the London Borough of Brent.	100

Cambridgeshire Health Authority	Electronic network to provide regional advice and information service for relatives of prisoners which is responsive, flexible and accessible. This will build on current telephone helpline service provided by HARP (Help and Advice for Relatives of Prisoners) and create a website to extend the information base.	75
Croydon Health Authority	To utilise the opportunity of the establishment of NHS Direct to coordinate other health and social care out-of-hours services operating in Croydon. To ensure access to out-of-hours care is as simple and straightforward as possible.	100
Department of Health	This project will embark on developing a unified tool to bridge the communication barrier between deaf-blind individuals and the society they live in. The tool will be universally applicable to all existing communication languages (Braille, Deaf-blind manual alphabet, etc.).	460
Doncaster Health Authority	Project will develop up to six GP practices as sites for accessing wider community health and social support services.	421
Drug and Alcohol Action Teams Kingston and Richmond	The ABC project will deliver electronic interventions (Harm Reduction Advice, Assessment and Referral) to marginalised individuals currently beyond the reach of conventional substance misuse services. Developing an Interactive Internet web across Drug Action Team Agencies and a secure Intranet system improving service delivery.	325
Dudley Health Authority	To pilot an arrest referral scheme for alcohol related offenders in Dudley, to reduce alcohol related re-offending and harm. Courts will remand on bail offenders who plead guilty, affording the opportunity to attend two sessions of cognitive behavioural alcohol intervention delivered by specialist alcohol workers which could be part of the pre-sentence report process. The scheme will be evaluated with a view to national dissemination	100
Kent & Medway Drug Action Team	The development of an IT based information network in relation to drug and substance misuse giving the public and practitioners relevant help, support and information.	90
North Nottinghamshire Health Authority	Establish multi agency teams for disabled children & families. Will include electronic data sharing, website and e-mail helpline.	316
North Primary Care Group	Internet based system for pre booking Demand Responsive Transport Services	107
Rotherham Health Authority	IT 2 Eat is an innovative pilot project addressing healthy eating issues by providing information and support to Older People. The project will offer access to dietary information, and to Internet shopping, via IT equipment in a range of community settings, and in	374

	people's own homes.	
South Staffs Health Authority	To develop electronic resources which address the need for accessible information and training tools that tackle many of the key issues, problems, and questions facing young people, with regard to the risks of unplanned teenage pregnancy and unhealthy lifestyles.	97
Southern Derbyshire Health Authority	DMRG will be an interagency multi disciplinary group responding to the needs of the community and drug users when the drug market has been disrupted through enforcement. Will include an interactive website.	1,163
Substance Misuse Advisory Service	Advisory service for commissioners and strategists involved in primary care based drug dependency treatment. Facilitation of and drawing opinion from a national GP network utilising an interactive website and online newsletter.	476
Tees Health Authority	A shared, anonymised database to combine the information kept by separate agencies on drug use by individuals. It would provide aggregated information to the DATs and their partner agencies to support and enhance their work in tackling drug misuse. Analyses would link drug misuse with health, crime, socio-economic and deprivation indices.	72
Wakefield Health Authority	This is an innovative pilot project that will develop, implement and evaluate multidisciplinary, cross-agency, electronic care planning (eCP) within services to adults with mental health problems across the Wakefield District.	218
Wakefield Health Authority	To develop an information technology system to support the operational delivery of the Immediate Support at Home Service. ISH is a multi-agency rapid response nursing and social care service, directed primarily at older people.	124
Wakefield Health Authority	The purpose of the proposed project is to develop a "Wakefield" branded health internet portal. This portal would provide an easy access route into all relevant local health information and related online services as they becomes available.	85
<b>Local Authority-led Projects:</b>		
Association of London Govt Transport and Environment Committee	This project will deliver a fully automated, electronically accessible parking and traffic appeals service. It will enable Londoners to pay parking fines and penalty payments on-line.	95

London Borough of Barnet	The project will enable the development of a web portal for the local community to open up access to public services in Barnet provided by the Council, Barnet Health Authority and other public and voluntary organisations.	458
Birmingham City Council	The main objective of the project is to join together foster carers providing a service to children in public care with those agencies that they need to interact with.	400
Bradford City Council	Improve the quality and effectiveness of public services by collaboration on developing electronic access and joint development of ICT. Focusing on life events of customers to ensure their needs are being effectively and efficiently met.	730
Brighton & Hove Council	To create a dynamic city wide portal delivering the widest range of public and private sector services and information for the greatest number of people in Brighton & Hove via the Internet, Internet TV, mobile devices and other channels.	417
Calderdale Metropolitan Borough Council	To establish the required e-government infrastructure and address issues restricting access to services, the Council proposes (with its partners) an interactive, multi lingual community information system.	302
Cambridgeshire County Council	To work with residents and service users, especially those currently excluded from access to public services, to design and pilot new terms of e-government which meet those needs for access to services and a voice in the local community government.	100
Cheltenham Borough Council	To create a pilot single web gateway to all public services in Gloucestershire, providing electronic one-stop access for all the county's citizens, but particularly for those whose circumstances may make access to information and services especially difficult.	99
Coventry City Council	The project will support the delivery of more targeted, integrated and coordinated public services in Coventry's High Priority Neighbourhoods (H.P.N.s). It will achieve this by developing a database containing key data agreed by the Partnership and community.	360
Dartford Borough Council	On line applications and electronic implementation of licensing process. Project fully meets the four basic requirements of e-government and assists in the realisation of the Councils Community Safety Plans.	100
Devon County Council	The Carers Support Direct system will be an Internet based service providing a single portal through which it will endeavour to provide access to all the services and information needed by individuals in their capacity as a carer.	488

East Riding of Yorkshire Council	A web-based approach to seeking the views of young people (aged 8-25) in the East Riding of Yorkshire, to enable services to be more responsive to the needs of rural young people and to enable the voice of young people to be heard more effectively in shaping services.	73
Essex County Council	Creating Live Community Networks in two Local Action Zones of high deprivation and engaging the 15% of youngsters most at risk of falling into chronic exclusion, helping agencies work together in an integrated and speedy fashion.	500
Gateshead Metropolitan Borough Council	Developing a seamless approach to facilitating the discharge of patients from hospital.	138
Isle of Wight Council	A multi-agency project which simplifies access to services for autistic children and their families.	194
Kennet District Council	Providing information, advice and easy access to services from central and local government, and other public sector bodies including the health authority.	146
Kent County Council	This project will use ICT to assist statutory agencies develop an integrated response to support early intervention work and tackle a number of the root causes of youth crime and social deprivation in Thanet. The approach will develop a model for family based early intervention, particularly for those families at risk and characterised by inter-generational criminality.	881
Kirklees Metropolitan Council	This proposal is based on 'action research' methods to involve residents of disadvantaged communities in Kirklees to work with the Council and other service providers to identify and design the services that they would wish to receive and use electronically through interactive TV.	765
London Borough of Newham	Development of a multi-application Smart Card, which will provide a basis for identification and authentication of citizens and remote access to e-government services.	410
Legal Services Commission for Merseyside	The Commission is encouraging the creation of Community Legal Service Partnerships whose aims are: the joint planning and monitoring of advice provision; needs assessment; mapping of provision; ensuring minimum quality standards; establishing co-operation and referral networks and resource maximisation.	180
Leicester City Council	To pilot the provision of electronic facilities for consultation and access to information covering a range of public services including Benefits, Council services, Cultural services, Health, Jobs, Social care, Training, and Transport.	557

Leicestershire County Council	"Lasagne" will provide electronic delivery of services and information using the Internet. It has a citizen focussed approach aimed particularly at people with disabilities and disadvantaged circumstances (isolation, language, poverty, social exclusion).	427
Lincolnshire County Council	An innovative road safety project aimed at cutting fatal and serious casualties in Lincolnshire which has one of the highest rates of fatalities in the UK. It will use the latest techniques and technology to advise, identify and train the road users in Lincolnshire.	413
Liverpool City Council	The Children's Network Online Participation and Assessment Service will provide online services for young people in need, their parents and support services and systems.	1,106
London Borough of Camden	A virtual gateway service to improve access to advice and support for micro businesses at a local level. Drawing on existing sources of support and creating new initiatives for micro businesses.	479
London Borough of Croydon	Ambassador One-Stop is a user-led, crisis intervention project for victims of hate crimes (racist incidents, domestic violence, homophobic attacks).	353
London Borough of Hackney	An anti fraud computer system for London. The proposal will provide every borough in London with their own anti fraud data matching and case management systems, provide a London wide extranet to connect all the boroughs together and provide a central repo	272
London Borough of Southwark	A "smart card" reward scheme for young people to promote good school attendance and positive behaviours. Promoted by a vibrant and innovative sport, arts and web café concept, points gained are exchanged for rewards through a range of leisure, arts and sports partners.	875
London Borough of Sutton	The project aims to demonstrate and evaluate the cost-effectiveness of the application of innovative methods of electronic assistance, to enable hitherto excluded groups of people with learning disabilities gain access to training and employment opportunities.	682
Manchester City Council	The project is a collaboration between a number of organisations to develop a customer led maintenance system. Involving tenants ordering repairs via internet access from their TV sets, remote working by contractors repairs operatives on a customer led appointment system, just in time materials delivery and management systems which achieve optimum performance.	1,200

North Norfolk District Council	Extension and development of the Council's Intranet site currently available to a few Members, into an interactive Internet site to allow selected services to be available "on-line" to the public, and enhance the communications with the Parish Councils in an extremely rural district area with an ageing population.	210
Nuneaton and Bedworth Borough Council	The Silver Surfers project aims to support independent living for older people in Nuneaton and Bedworth through computer and digital television access to the internet. Its central theme is opening up services to excluded people by signposting choice.	1,295
Reading Borough Council	The overall aim of the project is to establish a Disability Housing Register (DHR) for Reading. The project will be a unique alliance between housing, health and social services authorities working together with voluntary sector and private sector housing providers.	70
Rotherham Metropolitan Borough	This project will provide new and more effective ways for Rotherham young people, including those who currently do not use mainstream services, to access health information, advice and services.	365
Royal Borough of Kingston	A single access point to public services for a residential population of 555,000 and community interests in four Boroughs in South West London. It will provide information and service access for a wide range of public services, over the internet, assistance via local premises and via cable TV and provide a model for a London-wide public internet service.	3,500
Somerset County Council	Pilot to use a multi-agency call centre and web based portal providing a wide range of information and services linked to a network of local physical access points where assistance can be provided.	500
South Norfolk Council	This project aims to improve communication between District and Parish Councils and the local community by providing Parish Councils with IT facilities (email, Internet/Intranet, office applications etc) including training and support.	172
Surrey County Council	The project involves an analysis of the quality advantages of externalising social firms established by public authorities to provide work and training for disabled and disadvantaged people.	347
Swale Borough Council	Building on the current pilot project to rationalise the delivery of Police and Council services through a one stop shop.	650
Tameside Metropolitan Borough Council	The project will provide early interventions and remote monitoring for vulnerable people at all times in order to arrest deterioration and ensure efficacy of provision.	374

Trafford Metropolitan Borough Council	Establishment of a dedicated peripatetic home care team charged with providing an electronic home shopping service for socially excluded groups within Trafford.	135
Warwickshire County Council	To develop an older people's information database and associated '0845' telephone helpline, allowing older people a simple method of accessing a range of information, including hyperlinks to other relevant partner agencies such as Age Concern and the Benefits Agency.	100
West Devon Borough Council	A pilot project to link anti-poverty/social exclusion work with community planning and regeneration. Four settlements with differing characteristics will form the focus for the pilot work on community planning.	98
Wiltshire County Council	Pilot projects targeting joint provision between services for Children's and Young Peoples' support, and Parenting Support.	274
Wolverhampton Metropolitan Borough Council	The project will provide an multi-agency Internet link advice and information web site and telephone help line to provide a single point of contact for the referral of suspected/ alleged abuse of vulnerable adults.	243
Worcestershire County Council	ACTIVATE aims to create significant benefits for the provision of socially-necessary transport, as well as better and easier access to passenger transport services in general, using public electronic kiosks, sharing of data between the Council, the NHS and transport groups and innovative transportation planning software.	919
