NHS Connecting for Health	Subject: Data Standards: Commissioning Data Set Version 6 Schema
DATA SET CHANGE NOTICE	
This DSCN informs users of an update or clarification to the NHS Dictionary or Data Model that has been approved by the Information Standards Board	
Summary: DSCN 14/2007 introduced Commissioning Data Set Version 6 schema to the NHS Data Dictionary. A publication error by the NHS Data Model and Dictionary Service has led to the incorrect schema XSD files being published. The previously published files incorrectly included references to the Finished General Episode data structures in the "CDS TYPE 020 - Unfinished General Episode" but only when using the bulk update option of the CDS submission protocol. Further details are in the release notes of the corrected files. This DSCN introduces the correct schema files, which were previously appraised by ISB, to the Data Dictionary with the version date adjusted to 26th October 2007 for clarity. The correct schema does not require any changes to data items or definitions. Suppliers should use the correct schema instead of the incorrect one to ensure the appropriate (lighter) validation is applied. It is not anticipated this will delay the adoption of Commissioning Data Set Version 6. Any enquiries should be directed to datastandards@nhs.net

Commissioning Data Set Version 5

The CDS Version NHS005 consists of several components identified in the CDS Version NHS005 Type List.

CDS Version	Available From	Mandated From	Usable To	Message Format	Message Version
NHS005	01/10/2007	01/10/2007	31/03/2008	XML Schema	Download Message Schema v5-0-2007-06-01 and Message Documentation v5-0-2007-06-01
NHS005	01/09/2006	06/11/2006	01/10/2007	XML Schema	Download Message Schema v5-0-2006-08-04 and Message Documentation v5-0-2006-08-04
NHS005	01/04/2006	01/09/2006	Superseded before live use	XML Schema	Download V-5-0 schema and documentation

CDS Version 5-0-2007-06-01 is backward compatible with CDS Version 5-0-2006-08-04. Any data conforming with CDS Version 5-0-2006-08-04 conforms with CDS Version 5-0-2007-06-01. CDS Version 5-0-2006-08-04 includes all standards updates to DSCN 14/2005. In addition

- value 8 has been included in the enumeration for ADMISSION OFFER OUTCOME to correct an error in CDS Version 5-0-2006-08-04
- value 3 has been included in the enumeration for PRIORITY TYPE - DSCN 13/2006
- values 304, 371, 401, 812 and 840 have been included in the enumeration for TREATMENT FUNCTION CODE - DSCN 02/2007
- values 12, 13,14,15,16, 17 and 97 have been included in the enumeration for SOURCE OF REFERRAL FOR OUT-PATIENTS - DSCN 16/2007. Code 8 'Other', which is retired in DSCN 16/2007, has been retained in CDS Version5-0-2007-06-01 for backward compatibility.

The major enhancement is the inclusion of DSCNs 02/2005 and 13/2005 which introduce the Critical Care Minimum data Set (CCMDS) as an integral component of the CDS. The implementation of this version will therefore enable Trusts to submit the CCMDS data to the Secondary Uses Service.

V-5-0-2006-08-04 corrects an error in V-5-0 in the definition of the data type supporting CRITICAL CARE UNIT FUNCTION and restricts the length of CRITICAL CARE LOCAL IDENTIFIER to 8 characters.
