## HA ITS Pilots Technology Review

### What's it all about?

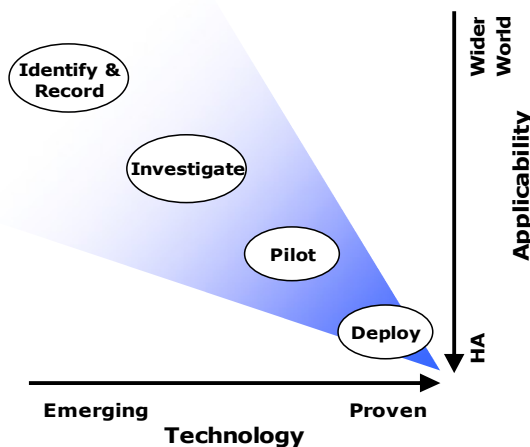

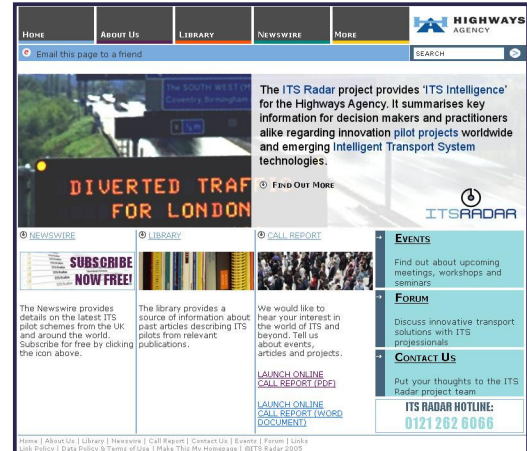

The main objective of this project is to raise awareness within the HA SSR Directorate about worldwide developments in ITS, which could lead to new ITS Pilots within the UK.

### What are the plans/objectives?

The ITS Pilots Technology Review provides 'ITS intelligence' for the HA. Summarised key information is utilised by decision makers and practitioners alike, regarding innovative pilot projects worldwide and emerging ITS technologies. ITS innovations are scored according to pre-defined criteria, including relevance to the HA. This project reviews other technologies deployed in various other arenas and analyses their applicability in the world of transport.

### How has this project benefited the HA?

The project has provided an improved, easily accessible knowledge base of ITS and other technological advances within the HA, clearly demonstrating linkages between promising pilots, ideas and concepts and deployed ITS tools.

The service enables earlier consideration of new technologies and in addition allows documentation where consideration has been given to new ideas, but may be held in abeyance due to the associated 'risks'.

### Key Deliverables/Outcomes

This knowledge management project is making the following resources available:

- A monthly Newswire service outlining new developments in the world of technology;
- A website containing information and research on topics of interest;
- An electronic library of information, including articles, bespoke reports and a summary of up and coming events;
- A series of regular summary reports; and
- Hot topic leaflets on an ad-hoc basis.

### How can you help?

We have developed a 'Call Report' process by which you and other colleagues can provide feedback to the ITS Radar Team. This might be as a result of attending an event, reading an article or coming across a relevant project. You can also alert the team of future events which may be of interest.

A soft copy of the 'Call Report' can be downloaded from [http://www.itsradar.co.uk/forms/call\\_report.doc](http://www.itsradar.co.uk/forms/call_report.doc)  
Completed forms can be posted electronically to [itsradar@fabermaunsell.com](mailto:itsradar@fabermaunsell.com)
