Notes

The above table has been prepared from data obtained from Business and Trade Statistics Limited.

Volumes have been converted to metric tonnes (1000 kgs = 1 metric tonne).

Price per tonne has been calculated on the basis of the total sales. It therefore represents an average of the prices paid in the year of import.

Value of imports includes carriage, freight and insurance costs.

Classification above (which is given by Customs & Excise) includes two products (meals and greaves).

"Other" row represents small and non-recurring imports.

U.K. IMPORTS GENERAL TRADE : HEADING/COUNTRY COO.
