By ANTON ANTONOVICZ

THIS is Mad Cow victim Vicky Simpson — whose plight could be a fatal blow to her.

Vicky, 44, was in bed and unable to talk, move or eat — may be the first known human to have caught the disease from a contaminated burger.

She is now fighting for life on a drip stand. Her last message to the world, scribbled on a cocktail napkin: "I want my life back."

Yesterday, her heartbroken grandmother, Betty, sobbed: "I've survived the rest of the disease from a burger. She's never been ill in her life. She was the healthiest child on earth. But she's always loved beef." X 26/7/94
