Yes/No N/A

Did you know where to park?

Yes/No N/A

Comments:

What were your initial actions at the incident site – please note if you took a command role?

I believe on our arrival the explosion had not long happened. Incident was effectively a running call for us. I pressed priority on channel 9, reported our location and brief description of incident, & requested officer + ambulances to scene. We then attended casualties to the PTO best of our ability with equipment available until further LAS arrived.
