

Revised Proposals - Constituency Breakdown Tables

The following tables have been produced by the Boundary Commission for England to assist understanding of its Revised Proposals, which are published on 16 October 2012.

Table 1 shows the relationship between each existing constituency and the constituencies in our revised proposals, in terms of the number of electors and the percentage of the electorate of each existing constituency that is included in a constituency in our initial proposals. For example, where that figure is shown as 100%, it means that all of the electorate of the existing constituency is included in a constituency in our revised proposals.

Table 2 shows the relationship between each constituency in our revised proposals and the existing constituencies, in terms of the number of electors and the percentage of the electorate of each constituency in our revised proposals that has come from an existing constituency. For example, where that figure is shown as 100%, it means that all of the electorate of a constituency in our revised proposals has come from one existing constituency.

If you have any queries about the review, please use the contact details shown at the foot of this page.

PLEASE NOTE THAT THESE TABLES ARE EMBARGOED UNTIL 00.01 ON 16 OCTOBER 2012.
