Mr Hayden

Further to your request we conducted the following checks;

John Prescott & Pauline Prescott, exact spellings.

John Prescott is N3500 on SO15 Op QUANTRAINE (S41). The source document for this nominal is D227 which is Exhibit NSF/35 - seven (7) notepads with handwritten text split from WAB/107. P183 shows the name John Prescott. This was recovered from 108 Alberta Avenue, Sutton. (Glen Mulcaire's address)

There was no trace on Pauline Prescott.

In addition to the exact spelling we checked on all of the following;

There were no hits that could have alluded to the popular media nick-names for John Prescott. These searches are for typed text and not scanned hand-writing.

There is trace on 'PREZA' in handwriting on Page 93 of exhibit SDA/62. This was split from the same WAB/107 exhibit mentioned above. These are handwritten notes and 'PREZA' is written once amongst text that appear to be relating to anti-natal appointments in September 2001 and June 2001. It is not clear whether this relates to John Prescott. The notes before and after relate to the names 'THOMPSON' and 'ALLOTT' with a re-appearing baby theme.

Further to this there is one entry of note. D186 is also from exhibit WAB/107. There are references 'JLP reset PIN 3333' on page 16 and just 'JLP' on Page 98. (John Prescott's middle name is Leslie). Again there is nothing further to suggest that this relates to John Prescott. P16 consists of notes relating to Helen Ashbury and P98 consists of notes that appear to concern Kate Middleton. We would suggest the 'JLP' relates James Lowther-Pinkerton N21, he appears to have had a lot work conducted on him. He has references on 11 documents and is Private Secretary to Princes William and Harry.

There were 13 references to a 'John'. There was nothing to suggest, without further information, any of these could be referring to John Prescott.
