Preface

The Monthly Return of Sea Fisheries Statistics: England, Wales, Scotland and Northern Ireland provides an up-to-date picture of landings into the UK. All the data in this return are provisional and do not reflect final landings figures for the period concerned. This is due to late returns of some catch data, especially shellfish. The UK figures for the equivalent period of the previous year given in Table 1 are also provisional, since they have been taken from last year's return to ensure direct comparability of the data.

The ports covered in this Return represent those ports in England and Wales which featured in the list of top UK ports by value of landings in 2005.

I recommend that you refer to the explanatory notes which are important in interpreting the data.

I hope that you will find this publication helpful as a source of information about landings into the major English and Welsh ports.

Explanatory Notes

1. Quantities of whole, headless or filleted at sea fish landed by UK and Foreign fishing vessels are shown in terms of their liveweight.
2. The total values in these tables are based on the realisation for first-hand sales of fish to all outlets, i.e. for human consumption and also for other uses such as fishmeal and animal feeding stuffs.
3. The term “UK landings” refers to the landings of UK registered fishing vessels.
4. Mackerel landings’ figures include a quantity caught by UK vessels but not actually landed at UK ports. These quantities are transhipped to foreign vessels in coastal waters and are later recorded as exports.
5. Difficulties in collecting statistics on shellfish landings mean that the available figures significantly under estimate the total landings in some instances. The figures are however thought to be broadly indicative of trends.
6. Figures for the current month are PROVISIONAL and do not reflect final landings figures for the period concerned. This is due to late returns for some catch data, especially shellfish. The UK figures for the equivalent period of the previous year given in Table 1 are also provisional, since they have been taken from last year’s return to ensure direct comparability with this year’s figures.
7. The following symbols apply throughout:
 - means “nil”
 - .. means “negligible” (less than half the last digit shown)
 - na means “not applicable”
