

UK Trade, November 2011

Coverage: **UK**

Date: **11 January 2012**

Geographical Area: **UK and GB**

Theme: **Economy**

UK Trade, November 2011

- The UK's deficit on seasonally adjusted trade in goods and services was £2.6 billion in November, compared with the deficit of £1.9 billion in October.
- The deficit on seasonally adjusted trade in goods was £8.6 billion in November, compared with the deficit of £7.9 billion in October.
- The surplus on seasonally adjusted trade in services was estimated at £6.1 billion in November, compared with the surplus of £6.0 billion in October.
- Excluding oil and erratic items, the seasonally adjusted volume of exports was 1.7 per cent lower, and the volume of imports was 1.1 per cent higher in November, compared with October.
- Export prices of goods fell by 0.4 per cent and import prices of goods fell by 0.2 per cent, compared with October.

UK Trade in Goods Summary for November 2011

Balance of UK trade in goods and services, November 2011

£ billion

		Balance of trade in goods			Balance of trade in services	Total trade balance
		EU	Non-EU	World		
2010	Nov	-3.6	-5.2	-8.8	5.6	-3.2
2011	Sep	-4.5	-5.7	-10.2	5.9	-4.3
	Oct	-3.3	-4.6	-7.9	6.0	-1.9
	Nov	-3.6	-5.0	-8.6	6.1	-2.6

Supplementary Analysis Page

The UK's deficit in Trade in Goods and Services increased to £2.6 billion in November, up from £1.9 billion in October.

The UK's surplus in Trade in Services increased to an estimated £6.1 billion, up from £6.0 billion in October. Exports of services rose by less than £0.1 billion (0.2 per cent) to £15.9 billion and imports of services fell by less than £0.1 billion (0.5 per cent) to reach £9.9 billion.

The UK's deficit in Trade in Goods increased to £8.6 billion, up from the deficit of £7.9 billion in October. Exports of goods fell by £0.4 billion (1.5 per cent) from £26.1 billion in October to £25.7 billion in November, and imports of goods rose by £0.4 billion (1.1 per cent) from October's £34.0 billion to £34.4 billion in November.

Exports

The £0.4 billion decrease in exports of goods was made up of slightly increased exports to EU countries of £13.6 billion (up by less than £0.1 billion from October) and reduced exports to non-EU countries of £12.2 billion (down £0.4 billion from October).

The decrease in exports was driven by lower exports of silver (down £0.3 billion) to non-EU countries, including India. Exports of intermediate goods and consumer goods other than cars, were each down £0.2 billion, largely to non-EU countries. This was offset by higher exports of oil (up £0.3 billion) and cars (up £0.1 billion) to EU and non-EU countries.

Imports

The £0.4 billion increase in total imports was made up increased imports from EU countries of £17.2 billion (up £0.4 billion from October) and slightly increased imports from non-EU countries of £17.2 billion. Imports from non-EU countries were at a record level in November 2011, slightly exceeding the previous record in October 2011.

The increase in total imports of goods was made up of higher imports of chemicals (up £0.5 billion) largely from EU countries, including Ireland. The record imports from non-EU countries were driven by increased imports of semi-manufactured goods other than chemicals (up £0.1 billion).

Volume and Prices

The volume of exports of goods fell by 1.7 per cent, driven by a fall in export volumes of consumer goods excluding cars (down 9.1 per cent) and intermediate goods (down 6.5 per cent), offset by increased exports volumes of cars (up 6.8 per cent) and basic materials (up 6.2 per cent).

Export prices of goods fell by 0.4 per cent, driven by lower prices of food, drink & tobacco, chemicals, cars, consumer goods other than cars, intermediate goods and capital goods, ships & aircraft and miscellaneous manufactures.

The volume of imports of goods rose by 1.1 per cent, driven by increased import volumes of chemicals (up 15.7 per cent), offset by a decline in import volumes of capital goods (down 4.0 per cent).

Import prices of goods fell by 0.2 per cent, driven by lower prices of chemicals, semi-manufactured goods other than chemicals, cars and consumer goods other than cars.

Notes for Supplementary Analysis Page

1. Care should be taken when using the month-on-month growth rates due to their volatility.

Value of UK trade in goods (seasonally adjusted)

In November, the UK's deficit on trade in goods widened by £0.8 billion to £8.6 billion, compared with a deficit of £7.9 billion in October.

Total exports fell by £0.4 billion (1.5 per cent) to £25.7 billion, but total imports rose by £0.4 billion (1.1 per cent) to £34.4 billion. At the commodity level:

Change in key commodity value, November 2011 compared with October 2011

	Exports (£m)	Imports (£m)
Oil (<i>see section on trade in oil</i>)	+260	+117
Cars	+120	+20
Consumer goods other than cars	-177	-100
Intermediate goods	-228	+39
Capital goods	-100	-121
Chemicals	-53	+482
Semi-manufactured goods other than chemicals	-37	+64

Trade in goods - EU analysis (seasonally adjusted)

In November, the deficit on trade in goods with EU countries widened by £0.3 billion to £3.6 billion, compared with a deficit of £3.3 billion in October.

EU exports rose by less than £0.1 billion (0.3 per cent) to £13.6 billion and EU imports rose by £0.4 billion (2.1 per cent) to £17.2 billion. At the commodity level:

Change in key commodity value (EU), November 2011 compared with October 2011

	Exports (£m)	Imports (£m)
Oil (<i>see background notes section 'trade in oil'</i>)	+116	+45
Cars	+44	-16
Consumer goods other than cars	-16	+18

Trade in services (seasonally adjusted)

In November, the UK's estimated surplus on trade in services rose to £6.1 billion, compared with the estimated surplus of £6.0 billion in October.

Exports rose by less than £0.1 billion (0.2 per cent) to £15.9 billion and imports fell by less than £0.1 billion (0.5 per cent) to £9.9 billion.

In the three months ending November, the estimated surplus on trade in services widened by £0.2 billion to £18.0 billion, compared with the surplus of £17.7 billion in the three months ending August.

Total exports remained at £47.5 billion and total imports fell by £0.2 billion (0.8 per cent) to £29.5 billion.

Records Sheet

UK trade record information for November 2011 can be accessed at the [ONS website](#) and can be accessed by clicking on [UK Trade, November 2011 dataset](#) page.

Background notes

1. Code of Practice for Official Statistics

National Statistics are produced to high professional standards set out in the [Code of Practice for Official Statistics](#). They undergo regular quality assurance reviews to ensure that they meet customer needs. They are produced free from any political interference.

2. Understanding the data

Short Guide to UK Trade

Ever since statistics on exports and imports of goods were first collected in 1697 UK trade has been one of the country's key economic indicators.

All [information](#) included in the monthly UK Trade Statistical Bulletin is on a Balance of Payments (BoP) basis and is seasonally adjusted. The release contains tables showing the total value of trade in goods together with index numbers of volume and price, figures analysed by broad commodity group (values and indices) and according to geographical area (values only).

In addition the Trade statistical bulletin also includes early monthly estimates of the value of trade in services.

Data appearing in the UK Trade statistical bulletin are also used as a direct input into the quarterly Balance of Payments and National Accounts.

Interpreting the data

Monthly commodity movements for Food, beverages and tobacco, Basic materials, Fuels other than oil, and Erratics (Ships, Aircraft, Precious stones, and Silver) are only detailed in this Statistical Bulletin where they are equal to or exceed £200 million (£400 million for three monthly comparisons).

Monthly country movements are only detailed in this Statistical Bulletin where they are equal to or exceed £0.1 billion (£0.3 billion for three monthly comparisons).

In months where quarterly and three monthly ending percentage changes for index data coincide there may be small differences between the data for methodological reasons. Quarterly data are the indexed form of an underlying constant price (for volume indices) or consistent quantity (for price indices) series. Three month ending data are the average of the index data in that period.

VAT Missing Trader Intra Community (MTIC) fraud

Import figures for trade in goods include adjustments to allow for the impact of VAT MTIC fraud.

The adjustments to trade in goods relate only to part of the carousel version of VAT MTIC fraud. This fraud leads to under recording of imports as fraudsters import goods from the EU, which they then sell on before disappearing without paying VAT on that sale. The goods are eventually exported. Such exports are declared and are therefore already reflected in the UK's trade in goods statistics.

Changes to the pattern of trading associated with MTIC fraud can make it difficult to analyse trade by commodity group and by country as changes in the impact of activity associated with this fraud affect both imports and exports. However, the MTIC trade adjustments are added to the EU import estimates derived from Intrastat returns as it is this part of the trading chain that is not generally recorded. In particular, adjustments affect trade in capital goods and intermediate goods - these categories include mobile phones and computer components, which are still the most widely affected goods.

International convention determines that the treatment of the impact is to adjust imports upwards by the relevant amounts of missing declarations (non-response). However, users may wish to interpret short term movements in imports excluding that part of the fraudulent activity that is not included in the import estimates, and for this purpose an analysis of the import figures with the VAT MTIC adjustments excluded is shown in Table 13.

Definitions and explanations

A glossary of terms is published in the [UK Balance of Payments Pink Book](#).

Use of the data

UK Trade is a key economic indicator due to the importance of international trade to the UK economy. It is also a very timely statistic, providing an early indicator of what is happening more generally in the economy.

In addition, it is a major component of two other key economic statistics – UK Gross Domestic Product (GDP) and the UK Balance of Payments. This means that there is a threefold potential for UK Trade statistics to inform the Government's view of the UK economy, as well as the views of others, such as economists, City analysts, academics, the media, and international organisations.

Notes on tables – rounding:

The sum of constituent items in tables do not always agree exactly with the totals shown due to rounding.

Symbols

- .. Not applicable
- Nil or less than half the final digit shown.

3. Methods

- **Composition of the data**
Detailed methodological notes are published in the [UK Balance of Payments \(Pink Book\)](#). [\(3.33 Mb Pdf\)](#)
- **Seasonal adjustment**
Seasonal adjustment aims to remove effects associated with the time of the year or the arrangement of the calendar so that movements within a time series may be more easily interpreted.
- **Deflation**

It is common for the value of a group of financial transactions to be measured in several time periods. The values measured will include both the change in the volume sold and the effect of the change of prices over that year. Deflation is the process whereby the effect of price change is removed from a set of values.

Chain-linked indices (chained volume measures) which are indexed to form the volume series in this bulletin differ from fixed base indices in that the growth from one year to the next is estimated by weighting the components using the contribution to value of trade in the immediately preceding year (effectively re-basing every year). This series of annually re-weighted annual growths is then 'chain-linked' to produce a continuous series.

The implied price deflators derived by comparing current price data to chained volume measures data are not the same as the price indices published in this statistical bulletin because the former are current weighted while the latter are base (2008) weighted.

Changes in trade associated with VAT MTIC fraud mean that comparisons of volume and prices (both including and excluding trade associated with VAT MTIC fraud) should be treated with a great deal of caution.

A paper entitled Overseas Trade Statistics Methodology describing the basis on which trade in goods statistics are compiled is available on the [UK Trade Info website](#).

A further paper Statistics on Trade in Goods (GSS Methodological Series No. 36) describing the adjustments that need to be applied to conform to IMF definitions for Balance of Payments and the division of responsibility between ONS and HMRC is available on the [ONS website \(384.4 Kb Pdf\)](#).

The Overseas Trade Statistics (OTS) data used as inputs to this statistical bulletin are collected and published by Her Majesty's Revenue and Customs (HMRC) on an International Merchandise Trade Statistics (IMTS) basis.

4. Quality

Basic quality information

Accuracy: Trade in goods figures for the most recent months are provisional and subject to revision in the light of (a) late trader data, revisions to trade prices and revised estimates of trading associated with VAT MTIC fraud, and (b) revisions to seasonal adjustment factors which are re-estimated every month.

Trade in services estimates have been derived from a number of monthly and quarterly sources. For components where no monthly data are available, estimates have been derived on the basis of recent trends. The results should be used with appropriate caution, as they are therefore likely to be less reliable than those for trade in goods. More details of the data sources, estimation methodology and reliability of the monthly estimates of trade in services were set out in Economic Trends (January 1996 and September 1997).

Reliability: Revisions to data provide one indication of the reliability of key indicators. The table below shows summary information on the size and direction of the revisions which have been made to the data covering a five year period. A statistical test has been applied to the average revision to find out if it is statistically significantly different from zero. An asterisk (*) shows that the test is significant. [An article explaining the past revisions performance for UK Trade statistics and what is being done to improve the first published estimates](#) was published on 9 May 2005 on the ONS website.

Revisions table, November 2011

£ million

	Revisions between first publication and estimates twelve months later		
	Value in latest period	Average over the last 5 years (mean revision)	Average over the last 5 years without regard to sign (average absolute revision)
Total trade exports (IKBH)	41,681	869	1,124
Total trade imports (IKBI)	44,247	628	986
Total trade balance (IKBJ)	-2,566	248	534

Download table

 [XLS format](#)
(14 Kb)

The table covers estimates of UK trade first published from May 2005 (for March 2005) to February 2011 (for December 2010). Spreadsheets giving these estimates and the calculations behind the averages in the table are available on the [ONS website](#).

[An article analysing past revisions to quarterly balance of payments current account data \(340.2 Kb Pdf\)](#) was published in the May 2007 edition of Economic & Labour Market Review.

[More information about revisions material in this Statistical Bulletin](#) can be found on the ONS website.

- Coherence** - EU enlargement and country coverage: Two more countries joined the EU from 1 January 2007. These countries were Bulgaria and Romania. In addition, the coverage of the Economic and Monetary Union (EMU) countries was extended to include Slovenia. In order to enable users to make long-run comparisons, data for the new definition EU and non-EU was produced from January 1998 onwards for value, and from January 1999 onwards for volume and price indices. At the same time data for the old definitions were no longer maintained. There are additional series for country groupings on the old definitions.

The coverage of EMU countries was extended to cover Cyprus and Malta from July 2008, Slovakia from January 2009, and Estonia from January 2011. Some EU and non-EU breakdowns of commodity data for Chained Volume Measures which are available from the

Statbase® service may be less reliable than the current price data. Please consult Marilyn Thomas on +44 (0)1633 455708 if you are considering using them.

Data have been combined for the United States and Puerto Rico, and for Dubai, Abu Dhabi, and Sharjah (the United Arab Emirates) from January 2009 onwards. Estimates are separately available for the United States and Dubai up till the end of 2008 on request.

6. Summary quality report

A [Summary Quality Report \(283.9 Kb Pdf\)](#) for this Statistical Bulletin and associated data can be found on the ONS website.

7. National Accounts revisions policy

[National Accounts revision policy \(41.6 Kb Pdf\)](#) can be found on the ONS website.

8. Revisions

Table 14R shows revisions to the main aggregates since the last Trade Statistical Bulletin of 9 December 2011. The revisions to trade in goods from October 2011 reflect revised data from Her Majesty's Revenue and Customs and other data suppliers, revised estimates of trading associated with VAT MTIC fraud, later survey data on trade prices and a re-assessment of seasonal factors.

Revisions to trade in services data, from January 2010 onwards, bring the monthly data into line with the UK Output, Income and Expenditure Statistical Bulletin published on 22 December 2011.

9. Publication policy

Details of the policy governing the release of new data are available from the Media Relations Office. Also available is [a list of the organisations given pre-publication access \(26.6 Kb Pdf\)](#) to the contents of this bulletin.

10. Accessing data

Supplementary commodity data for this Statistical Bulletin (Monthly Review of External Trade Statistics); and quarterly data analysed by industry according to the Standard Industrial Classification (UK Trade in Goods Analysed in Terms of Industries) are also available free of charge as PDF files on the [ONS website](#).

The complete run of data in the tables of this Statistical Bulletin are also available to view and download in other electronic formats free of charge using the ONS Time Series Data website service. Users can download the complete Statistical Bulletin in a choice of zipped formats, or view and download their own selections of individual series. The [Time Series Data](#) service can be accessed via the ONS website.

¹ These are provisional estimates subject to fluctuations when new or amended data become available. [†] Earliest date for revisions to trade in goods is January 2011.

² These are defined as ships, aircraft, precious stones and silver.

³ Export price index as a percentage of the import price index.

4 GROWTH RATES FOR VOLUME AND PRICE INDICES ¹ (TRADE IN GOODS)

1 Trade in petroleum and petroleum products. These figures differ from those published by the Department of Energy and Climate Change which are compiled from different sources and are on a time of shipment basis.

2 The average value per tonne may reflect not only changes in price but also changes in the commodity mix.

† Earliest date for revisions to trade in goods is October 2011.

1 These are provisional estimates subject to fluctuations when new or amended data become available.

[†] Earliest date for revisions to trade in goods is October 2011.

2 The weights shown are in proportion to the total value of trade in 2006 and are used to combine the volume indices to calculate the totals for 2007 onwards. For 2006 and earlier, totals are calculated using the equivalent weights for the previous year (eg totals for 2006 use 2005 weights).

3 These are defined as precious stones and silver in semi-manufactures, and as ships and aircraft in finished manufactures.
