# Volume 12

## Livestock Farming

Terms of Reference, Committee Members and Report Volumes vii  
A note on the footnotes viii  

1 Introduction 1

2 Key features of UK agriculture 4

- Introduction 4  
- Government’s influence on the agricultural economy 4  
- Contribution of beef and dairy production to UK agriculture 5  
- The European Union and CAP 6  
  - CAP regimes for beef and dairy farming 7  
    - Assistance to beef production 7  
    - Controls on milk production 8  

3 Promotion and marketing of dairy and beef products 9

- Introduction 9  
- Milk Marketing Boards 9  
- Meat and Livestock Commission 10  
- Developments between producers, retailers and consumers in beef marketing 11  

4 Cattle production and movement 12

- Introduction 12  
- Structure of UK cattle production 12  
- Sources of beef production 13  
- Movement of livestock 14  
  - Markets 15  
  - Transport to abattoirs 15  
- Record-keeping and cattle-tracking 15  
  - Identification and record-keeping requirements when BSE emerged 16  
  - Influence of BSE 17  
  - Problems with farmers’ records 18  

5 Breeding programmes and techniques 20

- Introduction 20  
- The UK cattle herd’s composition 20  
  - Factors influencing breeding decisions 20
8 Cattle diseases and their control and management on farm 42

Introduction 42
Some common cattle diseases 42
   Metabolic disorders 42
   Infectious diseases 43
   Parasitic diseases 44
Livestock disease control and management on farm 44
   Routine hygiene measures 44
   Prevention and treatment of disease 44
   Use of vets by farmers 47
   Avoidance of disease from fallen animals 47
      Disposal of fallen animals 47
      Regulation of on-farm disposal 48
      Emergence of carcass disposal problems following BSE 49
   Waste spreading 49
      Pre-BSE practices 49
      Impact of the Specified Bovine Offal ban 50

9 Control of animal disease epidemics 51

Introduction 51
Monitoring the emergence of new diseases in livestock 51
Eradication of notifiable diseases 51
   Examples of eradication schemes for other notifiable diseases 52
      Foot and mouth disease 52
      Brucellosis 53
      Bovine tuberculosis 53

10 Organic farming 55

Introduction 55
What is organic farming? 55
Standards for organic production 55
   General husbandry 56
   Feed 56
   Animal health 56
Organic farms and BSE 56

11 Other livestock 59

Introduction 59
Relevant aspects of UK sheep production 59
   Structure of the industry 59
   Sheep diet 60
Scrapie 60
Relevant aspects of UK pig and poultry production 61
Structure of the industries 61
Pig industry 61
Poultry industry 62
MBM in pig and poultry feed 62
Pig and poultry waste in cattle feed 63
Pigs and transmissible spongiform encephalopathies 63

12 Sequence of events in the BSE epidemic and how they affected farmers 65

Annex 1: Warble fly outbreaks and the use of organophosphates 67
Introduction 67
Eradication campaigns 67
Treatment and dosage for warble fly 68

Annex 2: The process for notification of BSE on farm 70

Glossary 73

Index 75

List of tables and figures
Table 1.1: Cattle herd terminology 3
Table 2.1: Concentrate input (kg per cow) 8
Table 4.1: UK cattle and calves (000) 12
Table 4.2: Approximate percentage of UK herd in each country, 1986 and 1995 13
Figure 4.1: Sources of home-produced beef, 1986 14
Figure 4.2: Sources of home-produced beef, 1995 14
Table 5.1: Dairy cow breeds in England and Wales 22
Table 6.1: Cattle feed terminology 29
Table 6.2: Typical cattle diet 33
Table 8.1: Common cattle vaccination programmes 46
Table 10.1: BSE incidence on organic farms up to November 1995 57
Table 10.2: Survey into the incidence of BSE on organic farms 57
Table 12.1: BSE events and their impact on farmers 65
