Volume 5
Animal Health, 1989–96

Terms of Reference, Committee Members and Report Volumes xvii
A note on the footnotes xviii

1 Introduction 1

2 The ruminant feed ban, 1989–96 4

Introduction 4
The legislation 4
The Bovine Spongiform Encephalopathy Order 1988 4
Extensions to the ban 5
Implementation of the Order 5
Responsibility for monitoring and enforcement under the Order 5
Legal powers of inspection and sampling 6
Enforcement difficulties 7
The lack of a reliable test for ruminant protein in feedstuffs 7
Home-mixers 7
Notice to enforcement officers 8
Veterinary Field Service 8
Local authorities 8
Notification of the ruminant feed ban to industry 10
Information to farmers 11
Initial efforts to enforce the Order 12
Cross-contamination in feedmills 13
Avoidance of cross-contamination in feedmills 14
The chronological account 15
The period prior to the identification of the first BAB 15
Development of the ELISA test 15
Dissemination of information 17
Dose 18
Rumoured UKASTA ban on all meat and bone meal 18
Further work on the ELISA test 18
Report of the Agriculture Select Committee 19
MAFF issues instructions to the SVS in the event that BABs are discovered 20
The Bovine Spongiform Encephalopathy (No. 2) Amendment Order 1990 21
ELISA test progress 22
UKASTA’s concerns about cross-contamination 22
ELISA test produces ‘accurate and reproducible results’ 24

Developments in 1991 – the first BAB is confirmed 25
The first BAB – maternal transmission is considered 25
Problems with the ELISA test emerge 26
SEAC considers the first BAB 26
Investigations into the cause of BABs continue 27
ELISA test progress 28
The Bovine Spongiform Encephalopathy Order 1991 29
The number of BAB cases increases 29
ELISA test progress 30

Developments in 1992 – infective feed identified as cause of BABs 31
Attack rate experiment begins 31
MAFF considers publishing BAB data 31
Feed carry-over becomes apparent 34
The Lamming Committee Report 35
Availability of the ELISA test 37
The inclusion of porcine MBM in ruminant rations is proposed 38
Concerns about non-compliance with the ban 39
SEAC’s consideration of BABs 41
Further BAB cases are anticipated 43
Meeting on UKASTA’s survey of feed compounders 43
MAFF acknowledges a six-month carry-over period of contaminated feed 46
Enforcement difficulties are identified 48

Developments in 1993 – testing of ruminant feeds is proposed 50
The first BABs born in 1990 are reported 50
Consideration of the inclusion of porcine material and tallow in ruminant feed 50
Mr Bradley suggests the ELISA test should be employed in the field 51
Further consideration of BABs by SEAC 52
Mr Taylor and Mr Bradley press for the ELISA test 53
Cross-contamination is suspected and a feed testing programme is pursued 54

Developments in 1994 – on-farm testing regime is established 59
Doubts cast on routine sampling powers 60
Study of the effect of rendering on BSE infectivity 64
Implementation of a voluntary feed sampling regime 66
Notification of voluntary testing regime 70
Mr Wilesmith briefs UKASTA on BAB case control study 71
SEAC discusses cross-contamination 72
Further monitoring is debated in light of cross-contamination concerns 72
The first BABs born in 1991 79
UKASTA considers excluding all MBM following confirmation that only a ‘very low dose’ is required to transmit BSE 80
SEAC publishes its report on BSE knowledge and research 82
The first positive ELISA test result 83
Development of the CVL questionnaire 84
Ministers are updated on the BAB situation 84
Compounders consider excluding MBM from ruminant rations 85
Fears grow that compounders might stop using MBM 87
Feeding of all mammalian protein to ruminants is banned 91
UKASTA seeks a way forward 92
MAFF contemplates UKASTA’s stance 94
UKASTA decides against a ban on MBM use 95
Validation of the ELISA test and its impact on manufacturers 96
Mr Packer advises Mr Waldegrave on cross-contamination and dose 96
Developments in 1995 – a mandatory routine sampling regime is pursued 98
UKASTA continues to question the value of the CVL questionnaire 98
Joint feed sampling proposal 98
Mrs Browning informs Parliament of BAB situation 100
SEAC reviews the voluntary testing regime 101
UKASTA queries integrity of the ELISA test 101
The Minister is updated on the BAB situation 102
Results of the attack rate experiment are reported to the Minister 103
Further progress on joint monitoring and enforcement programme 105
First BAB born in 1992 108
Further problems with the ELISA test 111
SEAC considers the 1992 BAB 112
Plans for advisory visits to feedmills 112
Announcement of ‘tightening the rules on BSE’ 115
Commission Decision 95/287/EC requires routine testing in mills 115
MAFF advises UKASTA on the implications of Commission Decision 95/287/EC and seeks assistance 117
MAFF meets with UKASTA to discuss cross-contamination in mills 118
A letter is sent to manufacturers and mixers of animal feedstuffs 119
UKASTA and MAFF meet to discuss implementation of Commission Decision 95/287/EC 121
Further steps to implement the mandatory sampling regime 121
Suspect 1992 BABs are confirmed 124
Mr Meldrum raises the possibility of banning MBM in all mammalian rations 124
Observations of the EC mission to inspect BSE control measures 126
A 1993 BAB is found 127
MAFF Ministers’ meeting on BSE 128
Draft revised Advisory Note for farmers 129
Mandatory sampling regime nears finalisation 129
Further work on ELISA test required 131
Developments in 1996 – the mandatory sampling regime is implemented 132
Routine testing at feedmills commences 132
Progress on Advisory Note to farmers 132
First round of results from ELISA testing in feedmills 133
Mammalian meat and bone meal ban is implemented 134
Discussion 136
Introduction 136
The scheme of the ruminant feed ban 136
Prohibition on the use of MBM in any animal feed 138
MAFF’s attitude to this solution 138
UKASTA’s attitude 139
Dedicated facilities 140
Sampling 144
Right of entry 144
The ELISA test 144
Guidance to the feed industry and farmers 148
Tallow and gelatine 149
Tallow 149
Gelatine 150

3 Introduction of the animal SBO ban 152
Introduction 152
Voluntary pet food ban 152
Voluntary measures taken by pet food manufacturers prior to May 1989 153
MAFF’s attitude to the use of SBO in pet food 155
Pet food manufacturers adopt a voluntary ban on specified offal 157
Voluntary animal SBO ban 158
Concerns about SBO in animal feed 158
MAFF’s resistance to UKASTA’s proposal for a voluntary animal SBO ban 165
UKASTA recommends a voluntary ban on SBO in animal feed 172
Observance of the voluntary animal SBO ban 173
Renderers’ cooperation with UKASTA’s voluntary ban 174
MAFF’s continued opposition following the introduction of the voluntary ban 178
Consideration of a statutory animal SBO ban 180
Ministers’ concerns allayed 181
Mr Gummer advises the Prime Minister 184
Increasing pressure on MAFF to ban SBO in animal feed 185
Discovery of a cat with spongiform encephalopathy 187
Consideration of MAFF’s presentation of the issues raised by the cat case 189
Pressure for a statutory ban from the NFU and others 193
SEAC meets to discuss the cat case 196
Pressure for an animal SBO ban builds 197
The NFU advises its members to avoid using MBM containing SBO 200
Contingency planning for an animal SBO ban 202
Agriculture Select Committee’s inquiry into BSE 205
Pressure from the food industry 206
Experimental transmission of BSE to a pig: SEAC recommends an animal SBO ban 206
Preparation of the legislation implementing the animal SBO ban 212
Drafting of the Order 213
Consultation on the Order 216
Industry and local authorities are informed of the Order 217
Introduction of the Order 218
Discussion 219
The pet food industry 219
UKASTA and UKRA 220
The NFU 221
What was MAFF’s attitude to an animal SBO ban? 221
Was MAFF’s policy reasonable? 223
Before the cat case 223
After the cat case 225
Pet food 227

4a Implementation, enforcement and monitoring of the animal SBO ban 228
Introduction 228
The animal SBO ban legislation 229
Role and responsibilities of local authorities 229
Division of responsibilities on the animal SBO ban 230
County Council responsibilities 230
District Council responsibilities 230
National Animal Health and Welfare Panel 231
The use of SBO-derived tallow in animal feed is considered
Mr Lawrence raises further concerns
The Code of Practice is issued to renderers
SVS visits continue
Animal By-Products Order 1992
Monitoring in knacker’s yards and hunt kennels, November 1990 to January 1993
AHC 91/55 is issued
1993 – A new system of monitoring: Mr Simmons’s ‘cradle to grave’ approach
Monitoring in slaughterhouses, collection centres and rendering plants under the ‘cradle to grave’ approach
Monitoring of knacker’s yards and hunt kennels from January 1993
Other developments in 1993
The use of SBO-derived tallow in animal feed
Reports from industry: ‘things are not as they should be’
Developments in 1994
Mr Simmons’s summary of the ‘February visits’
Realisation of the importance of the animal SBO ban
Growing concern about BABs
Study of the effect of rendering on BSE infectivity
Recognition that as little as 1 gram of infective material was capable of transmitting BSE to cattle
Response to Mr Simmons’s report
Meeting on 3 May 1994 decides on the way forward
Further concerns are raised by the industry
Implementing the recommendations
Unannounced visits to monitor SBO handling in slaughterhouses, collection centres and rendering plants every two months
Mr Fleetwood’s informal telephone survey
Development of a new SBO stain
Submission to the Minister
Consultation on proposed changes to the SBO controls
Confirmation that only a ‘very low dose’ is required to transmit BSE
New processing standards at renderers
Returns on visits pursuant to AHC 94/106
Further consideration of the use of SBO-derived tallow in animal feed
The infectivity in distal ileum of calves under the age of 6 months
The Spongiform Encephalopathy (Miscellaneous Amendments) Order 1994
Results of consultation on proposed changes to the SBO controls
Dr Cawthorne’s submission to the Parliamentary Secretary
Consideration of Dr Cawthorne’s submission 325
Returns on the next round of two-monthly visits pursuant to
AHC 94/106 326
Introduction of the MHS and the new stain for SBO 326
The Bovine Offal (Prohibition) (Amendment) Regulations 1995 327
The HAT exercise is established 328
Failure to stain SBO becomes apparent 328
Consultation on the remaining proposed legislative changes 331
SVS begins unannounced visits to check on staining 333
The use of bovine spinal cord and gelatine in animal feed 334
Mr Carrigan alleges that people are ‘cheating’ with SBO 340
Results of the SVS visits: ‘widespread and flagrant infringement’ 342
Introduction of the 1995 SBO Order 344
Surveillance by the MHS under review 348
Second round of SVS visits 350
Time and temperature checks at rendering plants 351
The third round of SVS visits 352
The Specified Bovine Offal Order 1995 353
Final results of the second round of SVS visits 356
Enforcement of SBO controls: ‘keeping up the pressure’ 358
The EC mission to inspect BSE control measures 360
The Chief Medical Officer expresses his concerns 361
Further SVS surveillance results and Mr Hogg meets with
slaughterhouse operators 365
Approval of rendering plants 370

4b Implementation, enforcement and monitoring
of the animal SBO ban: discussion 373

Introduction 373
The effectiveness of the ban 373
The significance of the BABs 374
Why was the animal SBO ban not effective? 375
(i) Potentially infective material not covered by the ban 375
   Bovine eyes 375
   Obvious nervous and lymphatic tissue 376
   Thymus and intestine of calves 376
   Dorsal root ganglia 376
   Tallow and gelatine 376
   Conclusions on potentially infective material not covered by
   the ban 377
(ii) Failure cleanly to remove SBO from matter which went into
   the animal feed chain 377
   Brain 377
Spinal cord
Conclusions on lack of clean removal of SBO

(iii) Tissues designated as SBO were incorporated in animal feed despite the ban
Accidental admixture or cross-contamination
Passing off
Conclusion on incorporation of tissues designated as SBO

What went wrong?
The failure to keep SBO separate

In the slaughterhouse
The animal SBO ban
Separation upon removal: the human SBO ban
Separation upon removal under the 1982 MSSR
Separation upon removal under the 1989 Regulations
Conclusions on the separation of SBO in slaughterhouses after removal from the carcass
Separation when leaving the slaughterhouse under the 1982 MSSR

Green offal
Carcass meat and specified offal
Permits

Separation when leaving the slaughterhouse under the 1989 Regulations
Conclusions on separation when leaving the slaughterhouse
Enforcement of the Regulations in slaughterhouses

Lack of obligation to separate SBO from other unfit material
Guidance to local authorities
Standards of local authority enforcement
Deregulation
Conclusions on enforcement of the Regulations in slaughterhouses

Monitoring by the Veterinary Field Service
Knacker’s yards

Regulation of knacker’s yards
Practice in knacker’s yards
Local authority enforcement in respect of knacker’s yards
Monitoring of knacker’s yards

Hunt kennels
Transit to renderers

Renderers

Cross-contamination at rendering plants
Enforcement and monitoring at rendering plants
Consideration given to the 1990 Order 413
Responsibilities for the 1990 Order 413
Fallen stock 415
The 1990 Order and accidental contamination at renderers 416
Enforceability of the 1990 Order 417
Reliance on the voluntary SBO ban 423
Could remedial measures have been included in the 1990 Order? 424
Consideration given to banning MBM from all animal feed 426
Consideration given to the animal SBO ban between 1990 and 1994 426
Staining 426
Weight checks 427
Adequacy of monitoring 428
(i) Lack of a statutory role 428
(ii) Lack of clearly defined obligations to be monitored 429
(iii) Lack of powers of entry 429
(iv) Uncertainty as to responsibilities for direction of the operations 430
The monitoring of enforcement in slaughterhouses 432
Conclusions on monitoring in slaughterhouses 433
Monitoring of enforcement at renderers 434
Monitoring of enforcement at collection centres 434
Monitoring of enforcement in knacker’s yards and hunt kennels 434
Conclusions on monitoring 435
Failure to take action before 1994 435
Conclusions on failure to take action before 1994 437
Did MAFF move with adequate speed to introduce the new scheme? 439
The lesson 440

Annex A to Chapter 4: Unfit meat and human food 441
Protections against unfit meat entering the human food chain prior to 1982 441
Licensing of slaughterhouses and knacker’s yards 441
Admission of animals and carcasses to a slaughterhouse 441
Determination in a slaughterhouse of fitness of meat for human consumption 443
Sterilisation of unfit meat at the slaughterhouse 443
Concerns of Environmental Health Officers in 1977 447
‘Operation Meathook’ 449
Meat (Sterilisation and Staining) Regulations 1982 (the 1982 MSSR) 450
Overview of changes 450
Detailed provisions 450
Categories of meat and offal 451
Sterilisation 452
Staining 452
Requirements and exemptions: permitted destinations 452
Requirements for sterilisation in slaughterhouses 453
Restrictions on removal from slaughterhouses 454
Requirements for sterilisation in knacker’s yards 455
Restrictions on removal from knacker’s yards 456
Requirements affecting removal of unfit meat from a place other than a slaughterhouse or knacker’s yard 456
Requirements as to freezing of meat 457
Requirements as to possession for sale, and preparation for sale, of meat 457
Requirements as to storage of meat 458
Exemption in cases of lack of equipment or exhaustion of supplies 459
Requirements on movement 459
Enforcement 465
CIEH criticisms of the system 469
Meat (Sterilisation and Staining) (Amendment) Regulations 1984 471
The Bovine Offal (Prohibition) Regulations 1989 472
The animal SBO ban 477
The Bovine Spongiform Encephalopathy Order 1991 479

Annex B to Chapter 4: Instructions to the Veterinary Field Service 480

Slaughterhouse instructions 480
Rendering plants and collection centres – instructions 482
Knacker’s yards and hunt kennels – instructions 484

5 Cattle-tracking 485

Introduction 485
The adequacy of existing regulations 485
Existing legislation 485
Legislation in force at the time BSE emerged 485
Legislation introduced after the discovery of BSE 486
Problems with existing requirements in relation to BSE 486
SEAC supports the proposals 490

Computerisation 490
The tracing systems in place in 1990 490
The BSE database 491
Use of IT in the AHG and SVS 491
The Agriculture Select Committee’s recommendation for a new computerised database 492
Evidence received by the Committee 492
6 Breeding

Introduction

Early consideration of cattle breeding and BSE

MAFF’s advice to veterinary surgeons

The Southwood Working Party consider maternal transmission

The Tyrrell Consultative Committee’s recommendation

MAFF considers issuing advice to farmers
