ANNEX 6

Driving Standards Agency (DSA)

Guide to Assessment / Marking

PURPOSE

The purpose of this guide is to explain the assessment criteria and recording of faults, under the 27-outcome / competency headings on the driving examiners marking sheet (DL25).

Although an attempt has been made to explain assessment in theory, it should be remembered assessment is a knowledge and practical based skill. This document does not attempt to describe every fault that could occur during a driving test. Examiners should apply the assessment principles in which they have been trained. The training of this skill is delivered at Cardington to a high standard by experienced examiner / trainers. Assessment is maintained through infield development and supervision supporting DSA’s quality assurance regime. Applying a robust quality assurance system preserves the quality of assessment skills of all driving examiners in conducting a professional, consistent and uniform driving test.

ASSESSMENT

Examiners are trained to assess driving tests to a uniform standard; the Chief Driving Examiner (CDE) sets these standards. An assessment of the ability to drive safely is made by taking direct observation of the candidates driving, assessed against a set of outcomes/competencies found on the DL25. As such, assessing a person’s competence to drive is based on the making of safety decisions and vehicle control.
Before any fault identification and analysis can be carried out, the outcome must first be defined. Any deviation from the defined outcome can then be seen as a fault. The weight or severity of the fault will depend on the extent of the deviation, and also the circumstances at that time. The fault can range from ‘not worthy of recording’ to ‘dangerous’.

**EXAMPLE OF DEFINED OUTCOMES (refer to diagram (B))**

At every junction the candidate should use the MSM / PSL Routine.

M - Check in the mirror to assess the speed and position of the vehicles behind

S – Signal clearly and in good time

M – Manoeuvre – use PSL

P – Position your vehicle correctly and in good time
  - Early positioning lets other road users know what you are going to do

S – Adjust your speed as necessary

L – Look for other traffic when you reach a point from which you can see

  - Access the situation
  - Decide to go or wait
  - Act accordingly

**DEFINITION OF DRIVING FAULTS - ASSESSMENT PARAMETERS**

Fault identified – **not worthy** (not worthy of recording).

- Any **insignificant** deviation from the defined outcome that does not compromise safety or can be a matter of finesse.

- **For example** – Dry steering, sequential gear changes, not pressing the button on top of the handbrake when applying it.
Fault identified – **Driving Fault** – (not an immediate fail).

- **Low Risk** - Any **sufficient** deviation from the defined outcome that does **not** compromise safety, or can be a matter of control - to justify a fault being recorded.

- **For example** – the candidate took observation before emerging at the junction. However, they misjudged the distance of an approaching vehicle, causing it to slow down, safety was not compromised.

(Sixteen or more of these faults would result in failure of the test.)

There can however be occasions when one specific driving fault could by constant repetition, be regarded as serious and therefore a significant risk; for example when a candidate **habitually** fails to take mirror observation when appropriate.

Fault identified – **Serious fault** - (entails immediate failure)

- **High Risk** - **Significant** deviation from the defined outcome with safety, control and/or legal requirement breached

- **For example** – the candidate did not take effective observation before emerging at the junction, unaware of any other road user who may have been expected to be there.

Fault identified – **Dangerous fault** – (entails immediate fail).

- **Actual Danger** - Safety, control and/or legal requirement breached that would have caused actual danger

- **For example** – the candidate did not take effective observation before emerging at the junction completely misjudged both speed and distance of an approaching vehicle. The examiner had to take appropriate action to avoid a collision.

Examiners, may have to take ‘action’ when it becomes necessary to do so in the interest of public safety, including their own and that of the candidate. Such intervention may be either - **VERBAL (ETA-V)** or **PHYSICAL (ETA-P)**.

**LOCATION OF FAULTS – (APPENDIX A)**

Having identified and assessed the fault it is important that the fault is recorded under the associated ‘outcome’ headings on the DL25. There are a number of faults that can occur during a driving test that initially may not appear appropriate to the relevant 27 headings. As such, to help with uniformity a ‘**Guide to locating and recording of faults**’ has been provided in **Appendix A**.
A general guide to help locate the fault to the relevant outcome is to determine the ‘cause’.

**CAUSE = Location on the (DL25)**

- “What was the Fault”?
- “How did the fault happen”?
- “What caused the fault to occur”?

**EFFECT = Assessment**

1. “To what degree was the deviation from the defined outcome”?
2. “Is safety or control compromised”?
3. “Has a legal requirement been breached”?
4. “What happened because of this fault”?

**Example of (Cause / Effect) - Stopping**

**CAUSE = (Clutch)**

Candidate attempts to pull up on the left at a safe and convenient place. The correct pressure is applied to the footbrake at the appropriate time. However, just before the vehicle stops, the clutch pedal was not pushed down to disengage the engine from the driving wheels causing the car to stall.

**EFFECT = (Driving Fault)**

Because the clutch pedal was not pushed down to disengage the engine from the driving wheels the car stalled. As such, the control of the vehicle was compromised. Under the circumstances at the time, the correct assessment of this deviation from the defined outcome is a ‘driving fault’.

Having identified the fault and assessed that it is worthy of recording, an oblique stroke is made on the DL25 under the relevant outcome/competence.
OUTCOME / COMPETENCIES (DL25)

Pages 183 to 211 list the expected outcome/competencies found on the DL25, explaining briefly what is expected of the candidate in that particular aspect of their driving. Examples of the assessment criteria have also been provided as a guide to the four levels of assessment.

This guide cannot include all of the situations that maybe encountered during a driving test. However, the following examples provide an insight into the assessment and marking process.

**Note:** If the effect is greater than the cause then the effect is marked. For example if a candidate approached a junction too fast and emerged – then the effect would be greater than the cause and although the speed approaching the junction caused the fault only the effect would be marked – **junctions observation**.
### Driving Test Report

**Candidate:**

**Application Ref.:**

**Date:**

**DTC Code / Authority:**

**Reg. No.:**

**Examiner:**

**ADT Cert. No.:**

(A) Expected Outcome/Competency

Deviation for the expected outcome identified

Assess the degree of deviation

Was the deviation sufficient to warrant a fault?

Yes

No fault recorded

Serious Fault Immediate fail

Driving Fault recorded

Low Risk

Not worthy - No fault recorded

Serious Fault recorded

High Risk

Dangerous Fault recorded

Actual Danger

Has a legal requirement been breached?

Yes

Is safety and control compromised?

Yes

No

Weight the fault

Is there a legal requirement?

Yes

No

Weight the fault

(B) Candidate approaches a junction and did not take effective observation before emerging

EXAMPLE OF DEFINED OUTCOME

Deviation for the expected outcome identified

Assess the degree of deviation

Was the deviation sufficient to warrant a fault?

Yes

Serious Fault Immediate fail

Driving Fault recorded

Low Risk

Not worthy - No fault recorded

Not worthy - No fault recorded

Serious Fault recorded

High Risk

Dangerous Fault recorded

Actual Danger

Has a legal requirement been breached?

Yes

Is safety and control compromised?

Yes

No

Weight the fault

Is there a legal requirement?

Yes

No

Weight the fault
ITEM 1a  2. EYESIGHT

Expected outcome/ competence

- Read, in good daylight, (with the aid of glasses or contact lenses if worn) a registration mark containing letters and figures 79.4 millimetres high fixed to a motor vehicle at a distance of 20.5 metres.
- Or a registration mark containing letters 79 millimetres, high fixed to a motor vehicle at a distance of 20 metres. (12.3 metres for category K).

Assessment Criteria – (example)

Driving Fault

Not applicable

Serious Fault

Unable to meet the requirements of the eyesight test.

Dangerous Fault

Not applicable
### ITEM 1b HIGHWAY CODE / SAFETY

<table>
<thead>
<tr>
<th>Driving Fault</th>
<th>Serious Fault</th>
<th>Dangerous Fault</th>
</tr>
</thead>
<tbody>
<tr>
<td>Of the 5 questions asked/ 6 traffic signs shown, a proportion are incorrect</td>
<td>All questions and traffic signs incorrect</td>
<td>Not a moving exercise therefore not possible to satisfy this criteria</td>
</tr>
</tbody>
</table>
ITEM 2

CONTROLLED STOP

3. Promptness / Control

Expected outcome / competence

- Display a high level of skill in bringing the vehicle to a stop, safely, promptly and under full control avoiding locking the wheels.
- Remember, in wet weather it can take twice as long to stop safely.

Assessment Criteria - (example = control)

Driving Fault

Locking the wheels, resulting in skidding for a short distance, but demonstrating effective skills in regaining control.

Serious Fault

Very harsh braking, resulting in locking the wheels. Vehicle continues to skid out of control, with either ineffective or no attempt to regain control.

Dangerous Fault

Any situation brought about by the above loss of control that resulted in actual danger to the examiner, candidate, the general public or property.
### ITEM 3

**REVERSE / LEFT**

**REVERSE WITH A TRAILER**

Control / Observation

<table>
<thead>
<tr>
<th>Expected outcome / competence</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Ability to control the vehicle accurately whilst reversing to the left.</td>
</tr>
<tr>
<td>• Effective all round observation throughout the manoeuvre showing consideration to other road users.</td>
</tr>
</tbody>

</tr>
</thead>
<tbody>
<tr>
<td>Any situation brought about by the above lack of observation that resulted in actual danger to the examiner, candidate, the general public or property.</td>
</tr>
</tbody>
</table>
ITEM 4
REVERSE / RIGHT
Control / Observation

Expected outcome / competence

• Demonstrate the ability to control the vehicle accurately whilst reversing to the right.
• Effective all round observation throughout the manoeuvre is required showing consideration to other road users.

Assessment Criteria – (example = control)

Driving Fault
Touching the kerb, taking the required shunt to correct a loss of control or accuracy

Serious Fault
Pronounced loss of control resulting in mounting the pavement.

Dangerous Fault
Any situation brought about by the above loss of control that resulted in actual danger to the examiner, candidate, the general public or property.
### ITEM 5

**REVERSE PARK ROAD / CAR PARK**

**Control / Observation**

**Expected outcome / competence**

- Ability to control the vehicle accurately when parking on the road or into a parking bay.
- Effective all round observation throughout the manoeuvre showing consideration to other road users.

**Assessment Criteria** – (example = control)

**Driving Fault**

Re-positioning required to correct a loss of control or accuracy

**Serious Fault**

Excessive re-positioning to correct complete misjudgement and/or significant loss of control. Final parking position parking - outside the bay

**Dangerous Fault**

Any situation brought about by the above loss of control that resulted in actual danger to the examiner, candidate, the general public or property.
<table>
<thead>
<tr>
<th>ITEM 6</th>
<th>TURN IN THE ROAD / M/CYCLE ‘U’ TURN</th>
</tr>
</thead>
<tbody>
<tr>
<td>Control / Observation</td>
<td></td>
</tr>
</tbody>
</table>

**Expected outcome / competence**

- Ability to display low speed control and observation skills necessary to carry out this exercise safely with due regard for other road users and pedestrians

**Assessment Criteria** – (example = observation)

**Driving Fault**

Late observation to the immediate rear when completing the reverse part of the manoeuvre.

**Serious Fault**

No observation to the immediate rear when completing the reverse part of the manoeuvre.

**Dangerous Fault**

Any situation brought about by the above lack of observation that resulted in actual danger to the examiner, candidate, the general public or property.
### Expected outcome / competence

- Display a basic knowledge of the fundamental safety checks applicable to the vehicle. For example safe fluid levels, lighting and tyre checks.

### Assessment Criteria – (examples)

#### Driving Fault

Category A, B & domestic categories: One driving fault for one or both questions answered incorrectly.
Category C, D, B+E & ADI: One driving fault for each question answered incorrectly.
Category C+E & D+E: One driving fault for each question answered incorrectly.

#### Serious fault

Category A, B & domestic categories: not applicable.
Category C, D, B+E & ADI: All five questions answered incorrectly.
Category C+E & D+E: Both questions answered incorrectly.

#### Dangerous Fault

Not applicable.
### ITEM 8

**TAXI MANOEUVRE**

**Control / Observation**

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>8 Taxi manoeuvre</td>
<td>control observation</td>
</tr>
</tbody>
</table>

#### Expected outcome / competence

- Display the ability to turn the car around by whatever means available.
- Effective, all round observation and consideration to other road users and pedestrians.
- The vehicle should be controlled smoothly making proper use of the clutch, accelerator, and brakes and steering.

#### Assessment Criteria – (example = observation)

**Driving Fault**

Late blind spot check when starting the manoeuvre.

**Serious Fault**

Essential observation omitted when starting the manoeuvre, unaware of the presence of other road users.

**Dangerous Fault**

Any situation brought about by the above lack of observation that resulted in actual danger to the examiner, candidate, the general public or property.
ITEM 9  TAXI WHEELCHAIR

Expected outcome / competence

- The ability to securely erect wheelchair ramps, safely
- Install the wheelchair and an imaginary wheelchair occupant into the vehicle, ensuring that the wheelchair and occupant is secured in readiness for the journey.
- The entire process should also be reversed.

Assessment Criteria – (example)

Driving Fault

Driving faults are not recorded for this exercise. This element should be assessed in its entirety.

Serious Fault

Not securing the ramps or wheelchair, or poor handling of the wheelchair, with potential serious risk to the occupant.

Dangerous Fault

Not applicable – as exercise does not involve third party

This exercise is only applicable to vehicles that are constructed to carry a wheelchair securely.
ITEM 10  UNCOUPLING / RE-COUPLING

<table>
<thead>
<tr>
<th>Expected outcome / competence</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Demonstrate the skills necessary when uncoupling and recoupling the vehicle</td>
</tr>
<tr>
<td>• Driving the towing vehicle to a designated position prior to recoupling safely.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Assessment Criteria – (example = Uncoupling)</th>
</tr>
</thead>
</table>

Driving Fault
When uncoupling, landing gear handle was not stored and secured.

Serious Fault – (example = Re-couple)
When re-coupling, landing gear handle was not stored and secured, resulting in a potential risk to other road users when the vehicle is mobile.

Dangerous Fault
Any fault that result in serious damage to the vehicle, candidate or third party.
### ITEM 11  PRECAUTIONS

#### Expected outcome / competence

- Before the engine is started, the candidate should make sure that they are comfortably seated and all controls can be safely operated.

#### Assessment Criteria – (example)

**Driving Fault**

After stalling at a road junction, handbrake applied but attempts to start the engine whilst in gear.

**Serious Fault**

At a road junction, engine started whilst in gear, resulting in vehicle entering the new road with potential risk to other road users.

**Dangerous Fault**

Any situation brought about by a lack of ability to recognise the need to operate or being unable to operate the controls, which directly affects other traffic or pedestrians and causes actual danger.
ITEM 12

CONTROL:

Accelerator / Clutch / Gears / Footbrake /
Parking Brake / MC Front Brake / Steering
Balance MC / LGV / PCV / Gear Exercise
PCV Door Exercise

Expected outcome / competence

This section covers, where appropriate, the safe and controlled use of accelerator, clutch, gears, footbrake, parking brake, and steering. Additional specific control elements apply to the drivers of different vehicle categories. The vehicles controls should be used as smoothly as possible, For e.g.

Making proper use of:

• Accelerator and clutch to make a smooth start – the clutch should be depressed before the vehicle stops.
• The correct gear should be selected to match the road and traffic conditions
• The vehicle should not be allowed to coast by running on in neutral or with the clutch depressed
• The footbrake should be used smoothly and progressively
• Full use of the parking brake should be used, to prevent the vehicle rolling backwards or forwards
• The vehicle should be steered as smoothly as possible. Steering too early / late, may cause the vehicle to hit the kerb or swing out towards another road user
• When a motorcycle is being ridden slowly, a straight line should be maintained. The machine should not wobble towards other vehicles

Assessment Criteria – (example = gears)

Driving Fault

Incorrect gear selection, resulting in a reduction in vehicle speed with no risk to following vehicles.

Serious Fault

Incorrect gear selection, resulting in a sudden reduction in vehicle speed, causing following traffic to alter speed/or direction.

Dangerous Fault

Any situation brought about by the above control faults, that resulted in actual danger to the examiner, candidate, the general public or property
<table>
<thead>
<tr>
<th>ITEM 13</th>
<th>MOVE OFF Safety / Control</th>
</tr>
</thead>
</table>

**Expected outcome / competence**

- The ability to move off smoothly and safely, on a gradient and at an angle
- Taking the correct precautionary observations.

**Assessment Criteria – (example = safely)**

**Driving Fault**

Incorrect timing of the blind spot check when moving off with no risk to other road users. For e.g. Checking the blind spot after the vehicle has moved off.

**Serious Fault**

Moving off into the path of traffic or failing to take observation at all.

**Dangerous Fault**

Any situation brought about by the above lack of observation, that resulted in actual danger to the examiner, candidate, the general public or property.
ITEM 14  USE OF MIRRORS – M/C REAR OBSERVATION

Expected outcome / competence

- Full and effective use of all mirrors fitted to the vehicle
- Mirrors must be checked carefully before signalling, changing direction or changing speed.
- Mirrors – Signal – Manoeuvre (MSM) routine should be displayed effectively.

Assessment Criteria – (example = change direction)

Driving Fault

Late use of exterior mirror before changing direction.

Serious Fault

Did not use the exterior mirror before a significant change in direction.

Dangerous Fault

Any situation brought about by the above serious neglect of using the mirrors, that resulted in actual danger to the examiner, candidate, and the general public or property.
ITEM 15

SIGNALS
Necessary / correctly / timed

Expected outcome / competence

- Signals should be given clearly to let other road users know the intended course to be taken.
- Signals shown in the Highway Code should only be used, if it would help other road users (including pedestrians).
- Signals should be given in good time and cancelled after the manoeuvre has been completed.
- Pedestrians should not be beckoned to cross the road.

Assessment Criteria – (example = necessary)

Driving Fault

Signal applied but cancelled before the change in direction was complete.

Serious Fault

Omitted an essential signal to inform other road user of a change in direction.

Dangerous Fault

Any situation brought about by the above fault, that resulted in actual danger to the examiner, candidate, the general public or property.
ITEM 16  CLEARANCE – OBSTRUCTIONS

Expected outcome/ competence

- Plenty of room should be allowed when passing stationary vehicles and obstructions.
- Ability to display the readiness to be prepared to slow down or stop, as a door may open, a child may run out or a vehicle may pull out without warning.

Assessment Criteria – (example)

Driving Fault
Too close to a stationary vehicle when road conditions allowed the correct clearance.

Serious Fault
Narrowly avoided a collision with a stationary vehicle when road conditions enabled the correct and safe course to be taken.

Dangerous Fault
Any situation brought about by the above fault, due to passing dangerously close to, or striking a stationary vehicle, that resulted in actual danger to the examiner, candidate, the general public or property
ITEM 17  
RESPONSE TO SIGNS / SIGNALS –
Traffic Signs
Road Markings
Traffic Lights
Traffic Controllers
Other road users

Expected outcome/ competence

- Ability to understand and be able to react to all traffic signs and road markings.
- Acting correctly at traffic lights, checking that the road is clear before proceeding when the green light shows.
- All signals should be obeyed given by police officers, traffic wardens and school crossing patrols.
- Display the awareness to be able to react to signals given by other road users, including people in charge of animals, and be ready to act accordingly.

Assessment Criteria – (example = traffic lights)

Driving Fault
Late reaction to an amber traffic light, with no effect to safety.

Serious Fault
Failing to comply correctly and promptly with an appropriate traffic light or breaching a legal requirement.

Dangerous Fault
Any situation brought about by the above breach of a legal requirement that resulted in actual danger to the examiner, candidate, the general public or property.

Action (ETA) may be required to avoid a legal requirement being breached.
ITEM 18

USE OF SPEED

Expected outcome/ competence

- Safe and reasonable progress should be made along the road bearing in mind the road, a traffic and weather conditions and the road signs and speed limits.
- The vehicle should be able to stop safely, well within the distance you can see to be clear.

Assessment Criteria – (example)

Driving Fault

Drove too fast for the prevailing road and / or traffic conditions for a short period.

Serious Fault

Going too fast for the prevailing road and / or traffic conditions, exceeding speed limits.

Dangerous Fault

Any situation brought about driving far too fast that resulted in actual danger to the examiner, candidate, and the general public or property.

Action (ETA) may be required to avoid a legal requirement being breached. Discretion must obviously be exercised in the degree to be considered acceptable and the tolerance threshold over any speed limit must be quite small.
ITEM 19  
FOLLOWING DISTANCE

**Expected outcome/ competence**

- The vehicle must always be a safe distance between yourself and other vehicles.
- On wet or slippery roads it takes much longer to stop.
- When the vehicle has stopped in traffic queues, sufficient space should be left to pull out if the vehicle in front has problems.

**Assessment Criteria – (example)**

**Driving Fault**

Did not maintain the full separation distance required.

**Serious Fault**

Drove too close to the vehicle ahead, where the separation distance left little margin for error.

**Dangerous Fault**

Any situation brought about by dangerously driving too close to the car in front that resulted in actual danger to the examiner, candidate, and the general public or property.

Action (ETA) should be taken as necessary to increase separation distance and so avoid the possibility of a collision.
ITEM 20

PROGRESS

Appropriate Speed

Undue Hesitation

Expected outcome/ competence

- The ability to drive at realistic speed appropriate to the road and traffic conditions.
- All hazards should be approached at a safe, controlled speed, without being over cautious or interfering with the progress of other traffic.

Assessment Criteria – (example = undue hesitation)

Driving Fault

Lack of judgement, not proceeding when it is safe and correct to do so.

Serious Fault

Stopping and waiting when it is safe and reasonable to proceed.

Dangerous Fault

It is unlikely that undue hesitancy could become dangerous in itself unless it was felt that this created situations that encouraged other road users to put themselves at risk.
ITEM 21 JUNCTIONS – (including roundabouts)

<table>
<thead>
<tr>
<th>Approach Speed</th>
<th>Observation</th>
<th>Turning Right</th>
<th>Turning Left</th>
<th>Cutting Corners</th>
</tr>
</thead>
</table>

**Expected outcome/ competence**

- Ability to judge the correct speed of approach so that the vehicle can enter a junction safely or stop if necessary.
- The vehicle should be positioned correctly, using the correct lane.
- When turning right, the vehicle should be positioned to the centre of the road as is safe.
- The vehicle should not cut the corner when turning right.
- When turning left, the vehicle should be over to the left to avoid swinging out.
- Watch out for cyclists and motorcyclists coming up on your left and pedestrians who are crossing.
- Effective observation must be given before moving into a junction and making sure it is safe before proceeding.

**Assessment Criteria – (example = observation)**

**Driving Fault**

A misjudgement of the speed and distance of an approaching vehicle. Safety of other road users was not compromised.

**Serious Fault**

Not taking effective observation before emerging at junctions, and emerging into the path of other vehicles.

**Dangerous Fault**

Any situation brought about by the severe lack of effective observation that resulted in actual danger to the examiner, candidate, the general public or property.
ITEM 22

JUDGEMENT –

Overtaking  
Meeting  
Crossing

**Expected outcome/ competence**

- Overtaking should only be carried out when it is safe to do so.
- A sufficient safety margin should be left when other vehicles are being overtaken. Cyclists and motorcyclists need as much space as other vehicles; they can wobble or swerve suddenly.
- Do not cut in too quickly after overtaking.
- Care should be taken when the width of the road is restricted or when the road narrows. If there is an obstruction on your side or not enough room for two vehicles to pass safely, the vehicle should be prepared to wait and let the approaching vehicles through.
- When turning right, other vehicles should not have to stop, slow down or swerve to allow the vehicle to complete its turn.

**Assessment Criteria – (example = meeting)**

**Driving Fault**

Late reaction when meeting approaching vehicles.

**Serious Fault**

Placing other drivers at risk by driving forward when they should have clearly given way.

**Dangerous Fault**

Any situation brought about by the inability to meet approaching traffic that resulted in actual danger to the examiner, candidate, and the general public or property.
ITEM 23  
POSITIONING -
Normal Driving
Lane Discipline

**Expected outcome/ competence**

- The vehicle should be positioned correctly for the intended route
- Where lanes are marked, the vehicle should be positioned to the middle of the lane
- Straddling lane markings should be avoided. Do not change lanes unnecessarily.

**Assessment Criteria – (example = normal driving)**

**Driving Fault**

Positioning errors when driving too close to the kerb.

**Serious Fault**

Persistently driving too close to the kerb, placing pedestrians at risk.

**Dangerous Fault**

Any situation brought about by driving dangerously close to the kerb that resulted in actual danger to the examiner, candidate, and the general public or property.
ITEM 24
PEDESTRIAN CROSSINGS

Expected outcome/ competence

- The ability to recognise the different types of pedestrian crossings and show courtesy and consideration towards pedestrians.
- At all crossings the vehicle should slow down and stop if there is anyone on the crossing.
- At zebra crossings the vehicle should slow down and be prepared to stop if there is anyone waiting to cross.
- Ability to give way to any pedestrians on a pelican crossing when the amber lights are flashing.
- Ability to give way to cyclists as well as pedestrians on a toucan crossing and act correctly at puffin crossings.

Assessment Criteria – (example)

Driving Fault

Late to react to flashing amber at a ‘pelican’ crossing.

Serious Fault

Failing to give way to pedestrians who had started to cross at a ‘pelican’ crossing.

Dangerous Fault

Any situation brought about by the above fault that resulted in actual danger to the examiner, candidate, the general public or property.
ITEM 25

POSITION / NORMAL
STOPs

Expected outcome/ competence

- The ability to choose a safe, legal and convenient place to stop, close to the edge of the kerb, where the vehicle will not obstruct the road and create a hazard.
- Display an understanding of - how and where to stop without causing danger to other road users.

Assessment Criteria – (example)

Driving Fault

Stopped, partially blocking a driveway with no inconvenience to other road users

Serious Fault

Stopped, completely blocking a driveway inconveniencing vehicle attempting to pull out.

Dangerous Fault

Any situation brought about by the above fault that resulted in actual danger to the examiner, candidate, the general public or property.
ITEM 26  

**AWARENESS / PLANNING**

**Expected outcome/ competence**

- Display an awareness and consideration for other road users at all times.
- Ability to think and plan ahead, judging what other road users are going to do, predicting how their actions will affect the vehicle, and react in good time.
- Ability to consider the actions of the more vulnerable groups of road users such as pedestrians, cyclists, motorcyclists and horse riders.
- Anticipating road and traffic conditions, acting in good time, rather than reacting to them at the last moment.

**Assessment Criteria – (example)**

**Driving Fault**

Late reaction to what other road users are doing.

**Serious Fault**

Last minute and sudden reaction to other road users compromising their safety.

**Dangerous Fault**

Any situation brought about by the above fault that resulted in actual danger to the examiner, candidate, and the general public or property.
ITEM 27

ANCILLARY CONTROLS

Expected outcome/ competence

- Ability to understand the function of all the controls and switches, especially those that have a bearing on road safety.
- These include indicators, lights, windscreen wipers, demisters and heaters.
- Ability to find these controls and operate them correctly, when necessary, without looking down or causing a loss of control.

Assessment Criteria – (example)

Driving Fault

Not completely familiar with the location and operation of controls, control of the vehicle was compromised but with no affect to road safety.

Serious Fault

Unaware of location and operation of the controls resulting in a serious loss of vehicle control, road safety compromised.

Dangerous Fault

Any situation brought about by the above fault that resulted in actual danger to the examiner, candidate, the general public or property.
A GUIDE TO LOCATING AND RECORDING FAULTS ON THE DL25

(This is not a guide to assessment)

The information contained within this document is intended to be used as a guide to the location of fault markings on the DL25 and to ensure uniformity. It is not intended as a guide to the assessment of faults. Driving Examiners of all grades were consulted and helped to prepare this document. It is not definitive and its content may be subject to alterations to reflect changing regulations and circumstances.
1. (a) EYESIGHT
Read registration incorrectly for the fourth time using the tape

1. (b) HIGHWAY CODE/Safety
Incorrect answers to questions (Category F/G/H)/(Category D, D+E, D1)

2. CONTROLLED STOP

Promptness
Late or slow reaction to the signal

Control
Applying the handbrake before stopping
Skidding out of control
Missing the footbrake pedal
Letting go of the steering wheel

3. REVERSE LEFT / WITH TRAILER
(Recorded when reverse gear is selected)

Control
Poor co-ordination of controls
Stalling
Mounting the pavement or kerb
Turning the steering wheel the wrong way
Going wide after the corner
Finishing at an acute angle
Scrubbing-brushing-touching the kerb
Taking an excessive amount of time to complete the manoeuvre

Observation
No blind spot checks
No observation at or before the point of turn
Excessive use of the door mirrors
Not looking directly behind
Not reacting to passing or approaching vehicles
Not reacting to pedestrians
Waiting unnecessarily for other roads users
4. REVERSE RIGHT

As Reverse Left

5. REVERSE PARK

(Recorded when reverse gear is selected)

Control.
Poor co-ordination of controls
Scrubbing/brushing the kerb
Unnecessary shunting backwards and forwards
Getting too close to the object car
Mounting the pavement
Turning the steering wheel the wrong way
Parking too far from the kerb
Stalling
Not completing within two car lengths
Finishing at an acute angle to the kerb

Car Park.
Poor co-ordination of controls
Ending up straddling two bays
Unnecessary shunting forwards and backwards
Turning the steering wheel the wrong way
Stalling

Observation.
No blind spot checks
Relying too much or entirely on the mirrors
Ineffective observation
Looking but not reacting to other vehicles or pedestrians
Waiting too long for other users in the car park

6. TURN IN THE ROAD

Control.
Poor co-ordination of controls
Mounting the pavement or kerb
Stalling
Turning the wheel the wrong way
Taking an excessively long time to complete the manoeuvre

Observation.
No blind spot checks
Not looking to the left or right before reversing or pulling forwards
Not looking directly behind
Not reacting to passing or approaching vehicles
Not reacting to pedestrians
Waiting unnecessarily for other road users

7. VEHICLE CHECKS

1 or 2 questions incorrect = 1 driving fault

8. TAXI MANOEUVRE

Examples of faults on this exercise will depend on the candidate’s choice of how they wish to turn the vehicle around (see other manoeuvres).

9. TAXI WHEELCHAIR

Wheelchair brakes not applied
Wheelchair falling off ramps
Wheelchair belts / harness not used or not secured

10. UNCOUPLE/ RECOUPLE

11. PRECAUTIONS

Leaving in gear with the clutch up and starting the engine

12. CONTROL

Accelerator
Uncontrolled use
Excessive revs

Clutch
Not depressing the clutch pedal before stopping
Uncontrolled engagement after changing gear

Gears
Clutch Coasting

Looking down when changing gear resulting loss of steering control
Selecting the wrong gear for the road and traffic conditions
Footbrake.
Uncontrolled use resulting in pulling up too early or too late
Late or harsh braking
Missing the brake pedal completely

Handbrake.
Applying whilst in motion
Not applying where necessary resulting in rolling forwards or backwards
Allowing the vehicle to ‘creep’ with an automatic
Unable to release fully

Steering.
Unable to maintain a steady course in normal driving
“Swan Neck” turns when turning right
At a normal stop, mounting and dismounting the kerb
Not following the contour of the kerb at a bell mouth junction

13 MOVE OFF

Safely.
No blind spot checks / incorrectly timed checks
Moving away unsafely
Blind spot check only over the left shoulder
Pulling away with the left signal on

Under Control.
Stalling
Repeated stalling
Moving off with the handbrake applied
Rolling backwards when attempting to move off
Not engaging a gear and attempting to move off
Attempting to pull away in too high a gear

14. USE OF MIRRORS WELL BEFORE

Signalling/Changing direction/Stopping.
Not using the exterior mirrors when essential
Using the mirrors but not reacting to the information
Not using the mirrors at all
Pulling up with no mirror checks
Increasing speed with no mirror checks
Late use of mirrors

15. SIGNALS

Where necessary.
Omitting to re-apply when it self cancels
Omitting to give a signal where necessary

Correctly.
Signalling unnecessarily
Wrong arm signals
Omitting to cancel after use
Incorrect (i.e. left for right, right for left)
Flash the headlights at another driver to proceed or turn
Having the hazard lights on whilst on the move
Unnecessary use of the horn
Beckoning pedestrians

Properly Timed.
Giving late exit signals at roundabouts
Arriving at a junction and then signalling
Signalling after starting the manoeuvre
Signalling far too early or too late Misleading signal before intended left and right turn

16. CLEARANCE TO OBSTRUCTIONS

Driving too close to stationary vehicles and obstructions

17. RESPONSE TO SIGNS AND SIGNALS

Traffic signs.
Going to the wrong side of a keep left sign
Non compliance with a stop sign
Non-compliance with a No Entry sign
Driving in a Bus Lane when times on the sign prohibit its use
Not complying with Mandatory signs

Road markings.
Unnecessarily crossing the solid white centre lines
Not conforming to directional arrows
Stopping in a yellow box junction when the exit is not clear

Traffic lights.
Waiting at a green filter light when safe to proceed
Not conforming to a red light
Late reaction to the amber traffic light

Remain at the stop line when safe to move forwards
Stopping beyond the solid white line going into an area designated for cyclists

Traffic controller.
Police
Traffic warden
School crossing patrol
Other persons directing traffic

Other road users.  
Not reacting appropriately to the signals given by other road users

18. USE OF SPEED

Driving too fast for prevailing road, traffic and weather conditions
Breaking the speed limit

19. FOLLOWING DISTANCE

Getting too close to moving vehicles
Pulling up too close to vehicle ahead

20. PROGRESS

Driving at an appropriate speed for the road and traffic conditions
Holding up following traffic

Avoiding undue hesitation.
Stopping unnecessarily at junctions and other hazards
Not proceeding when it is safe to do so at junctions

21. JUNCTIONS

Approach speed.
Approaching too fast
Approaching too slow

Observation.
Not taking effective observation before emerging
Looking both ways but still emerging to affect other road users

Turning right.
Positioning too far to the left
Positioning too far to the right
On major to minor stopping short of the turning point
Incorrect position before turning right
Turning left.

- Positioning too far to the right or too close to the kerb
- Swinging out prior to reaching the corner
- Positioning in an unmarked inappropriate lane to turn left

Cutting Right Corners

- Cutting corners, from major to minor roads

22. JUDGEMENT WHEN

Overtaking
- Cutting in after overtaking
- Attempting to overtake in a hazardous place
- Unsafe overtaking

Meeting Traffic
- Failure to show proper judgement when meeting approaching traffic

Crossing Traffic
- Turning right across the path of oncoming road users

23. POSITIONING

Normal driving
- Too close to the kerb
- Too far from the kerb
- Not using bus or cycle lanes when the times allow its use
- On dual carriageways driving in the right hand lane
- Cutting across the normal road position when going ahead at roundabouts

Lane discipline
- Straddling lanes marked on roundabouts when going ahead or when turning
- Straddling a bus lane

24. PEDESTRIAN CROSSINGS

- Approaching too fast
- Not reacting to the lights at a pedestrian controlled crossing
- Pulling away well before the crossing is clear of pedestrians
- Not stopping when necessary
- Beckoning pedestrians to cross
25. POSITION FOR NORMAL STOPS

Normal stop not made in a safe position
Both nearside wheels on the kerb / pavement
Over a driveway
At a bus stop

Too far from the kerb
Too near to a junction
Opposite other parked vehicles

26. AWARENESS AND PLANNING

Failure to judge what other road users are going to do and react accordingly

27. ANCILLARY CONTROLS

Failure to use ancillary controls when necessary
Unable to operate controls
Not able to locate or operate essential ancillary controls
Loss of control whilst operating ancillary controls
