

# Productive Community Services

## Team Guidance Poster

### HOW IT WORKS:

- the Productive Community Services programme is a scalable, team based application of Lean in community based settings
- it is a field focused, community team based programme. Suitable for implementation by different teams from District Nurses through to Occupational Therapists, from traditional to rapid response and from specialist to generalist clinical teams
- you will implement a structured series of twelve self directed learning modules with coaching from your organisation
- the modules build from the bottom up in a defined sequence. From the bottom and from left to right, working towards creating your Productive Community Service
- there is a heavy emphasis on planning to ensure a solid, stable foundation for improved care delivery.
