Demand-led Calculator – Known Issues

Last updated: 19 May 2008

1/ After the cancel button is clicked, a message appears saying that the process has been cancelled, but is then followed by another message which says that the funding calculations have failed.

**Suggested Action:** No action is required. The second error message is effectively a duplicate message and the DLC will continue to work after OK is clicked.

2/ There is an error in the DLC_0607.mdb database that underpins the DLC application that causes the error ‘’ when trying to run the calculation.

**Suggested Action:** In the ‘Lookup_ProvidersSuccessRate’ table in the DLC_0607.mdb database (found in the ‘All Users’ Application Data folder) find your UPIN and replace any null values with 0.
