Demand-led Calculator – Known Issues

Last updated: 21 Dec 2007

1/ After the cancel button is clicked, a message appears saying that the process has been cancelled, but is then followed by another message which says that the funding calculations have failed.

Suggested Action: No action is required. The second error message is effectively a duplicate message and the DLC will continue to work after OK is clicked.

2/ The SLN value for NVQs in 16-18 and Adult Learner responsive are 450 glh, rather than the 520 glh as state din the LAD and LSC documents.

Suggested Action: Providers should be aware of this issue if they deliver larger volumes of NVQs coded as 11 in ILR field A18. The LSC is looking into providing a fix for this error.

3/ The achievement element for Apprenticeships under the Employer Responsive Model is currently applied to all component learning aims of the Apprenticeship. This approach is not final, and may be changed in the next release of DLC.
