Reporting

This is the tab where reports based on provider ILR data are provided. Reports can be viewed at national / regional / local area office levels, or for an individual provider. This can be selected via the local area drop-down box. There are various options available as indicated below, but this section is still developing so more details to follow:

Report types are selectable from the drop-down menu:

To view a report, left click on the appropriate report name and click the Select Report button. Your report will then appear in the bottom half of the screen after a few moments.
Once the report is on screen a range of parameters are provided for each report to allow you to make some additional selections, e.g.

These parameters will change depending on which report you choose, e.g. you may be able to select age groups on one report and gender on another.
