National Management Group Report to Council

Introduction

1 This paper introduces the management group report to Council.
2 Following work undertaken to review the effectiveness of reports to Council, we are proposing a new style report to provide a greater focus on key actions and impact from across the LSC.
3 Attached to this covering paper is the first report using the new style to report our progress in delivering our PSA targets and corporate priorities. In future reports we will also report progress against our updated suite of priorities as set out in our new Annual Statement of Priorities – Raising our Game.
4 Subject to the endorsement of Council in using this new format, we propose to share the ‘Executive Summary’ section of the report with key external stakeholders and partners involved in improving skills and learning opportunities across England.
5 A separate update on finance and budgets will be provided by David Russell during the meeting.

Clearance

6 The Director of Strategy and Communications has cleared this paper and accompanying report.
