

APPLIANCE EQUIPMENT PPE

- Run out of stretchers – using 2 pieces
- Used BA cylinder on casualty for confidence of casualty. Ran out of laerdal and FRU minuterian wasn't brought down. FRU scoop stretcher not used
- Committed in BA not started up. No need no smoke took them off
- Poor lighting equipment – mobile halogen re-chargeable battery
- Lack of awareness of SOG equipment no one knew CHEL existed
- Only have 1 020P, 1 CHEL, 1 BCU, etc, no good with 4 scenes. CUs don't have EPDs
- Got crews away as soon as possible to re-deploy
- Shadwell and Dockhead needed BA sets to put appliances on the run. Couldn't get them from anywhere F261 at the run all day. Bow took set back and led to F261 coming off run
- Can't get whole sets on one phonecall. Need to chase it
- BCU ordered to RMC to help MTL RMC

PREVIOUS TRAINING

- All that training out the window
- You

ENROUTE – ARRIVAL

- F33 tried 4 times to send major incident before on 4th it was taken no busy signal at time
- Secondary devices/CBRN were considered. EPDs were worn 123 used but too many people there and it was too late anyway
- F26
