

Highways Agency - Bridge Inspection Schedule (Road Bridges)

NB: Principal inspections follow a 4 year cycle with General inspections at the intervening 2 and 4 year points. However outside influences and constraints may cause inspections to be re-scheduled (e.g. construction work on the bridge in question or in close proximity, railway possessions not available, and the need to register specialist equipment such as confined spaces access and abutment inspections etc).

NB: The area column in the spreadsheet relates to the Highways Agency Maintenance Area or private operator, and the Structure Key is a unique identifier.

| Area | Structure Key | Structure Name | Structure Number | Eastings | Northings | Road | Kilometrage | Bridge Type | Last Inspection Date | Last Inspection Type | Next Inspection Date | Next Inspection Type | Date of Construction |
|--------|---------------|-------------------------|------------------|----------|-----------|------|-------------|----------------------------------|----------------------|----------------------|----------------------|----------------------|----------------------|
