Pritpal Thind

**Email:**

pritpal.thind@sonarinformatics.com

**Telephone:**

0208 811 2307

**Organisation name:**

Sonar Informatics Limited

**Please choose the description below that best fits your organisation’s main role:**

Private sector (med tech)

**What can the NHS and NHS Commissioning Board learn from national and international best practice to accelerate the pace and scale of adoption of innovations throughout the NHS?**

System that help Consultations meet a base Standard by providing a suitable system.

**What specific actions do you think national NHS bodies, such as the NHS National Commissioning Board, need to take to encourage and stimulate the successful and rapid adoption and spread of innovations throughout the NHS?**

We are a small developer, and have shown our systems to numerous PCT's, over the last 2 years, and after getting glowing responses, we have not made much progress. The commissioning of services are too hit and miss and also very reliant on individual experience and views of the commissioners.

A central repository of innovative ideas and experience.

**Do you have any further comments about accelerating the adoption and spread of innovation in healthcare?**

I would like to present some ideas we have to some where we could get exposure of our systems and developments.

We would like to be able to follow up interesting comments and case studies. Can we contact you for this purpose?

**Yes**

**Do you want to be kept in touch with the next steps in this process?**
Yes

Do you want to be included in a wider community of interest?
Yes

What specific actions do you think local NHS bodies, such as providers and Clinical Commissioning Groups, need to take to encourage and stimulate the successful and rapid adoption and spread of innovations throughout the NHS?

Small ideas can lead to big change. Many great small ideas are left behind to be learned again and again in all settings.
