Social & Analysis Publication Scheme and Charging Rates

In addition to tables prepared for the standard outputs produced by Social & Analysis bespoke adhoc analyses may be commissioned independently.

Bespoke analyses will be issued to the requesting customer under an Open Government Licence (OGL) by the provision of a link to a URL on the ONS website and are then available free to all other users.

Charging Rates

The cost of the commissioned output reflects the amount of time taken to develop the analyses and undertake all necessary processes in respect of quality and disclosure control. The charges reflect the Full Economic Costs associated with the delivery of the service.

Price bands have been identified to give customers a guide of how much their analyses will cost; however, the final cost will be agreed with the customer prior to any work commencing.

We will deliver the commissioned outputs within 10 working days of receiving written acceptance of the quote, except in exceptional circumstances. In many cases, where requests are not complex, the outputs can be delivered within 5 working days.

Please note that charges for requests which use ASHE data will be based on the ASHE charging rates available here: http://www.ons.gov.uk/ons/about-ons/business-transparency/freedom-of-information/what-can-i-request/index.html

The price bands are set out below:
