Title: Fw: Urgent Please: Labour Market Key Figures on live website

Some of the Labour Market Key Figures have disappeared from the live site:

The following Key Figures have disappeared:

Unemployment
Employment
Claimant Count
Vacancies
Please see screen print from live site pasted at the end of this email.

All of the above Key Figures components have been updated on Tridion for the next LM release to be published on 12 September. However updating the components seems to have unpublished the existing Key Figures from the live site. This should not, of course, have happened.

NB: Please do not do anything that would result in any risk of the Key Figures to be published on 12 September being published early. It would be a reputational disaster for ONS if the employment or unemployment rates were to be published early as these are very high profile market sensitive statistics.

I don't think it would be disastrous if these Key Figures did not reappear on the live site until 12 September but I thought I should flag the issue up urgently.
A rise of 0.7 percentage points from 2008 (Annually), England. This is an index number. 1995=100. Last updated: 29 March 2012

**Producer Price Index: Input Price -2.4% (July 2012)**
