

## **CG GOC (MND(SE) Southern Iraq Update – 3 August 2005**

- The threat from IEDs is worrying, with our electronic counter measures unable to defend against the [REDACTED] and the use of [REDACTED] and (in the most recent attack) shaped charges able to penetrate armoured vehicles up to and including [REDACTED]. This technology has now been used across MND(SE) and indeed further north having first been seen in Maysan.
