

Announcement of methodological change to Statistics on Obesity, Physical Activity and Diet: England, 2014 [NS]¹

This methodological change notice states the amendments made to the above publication. These changes are designed to give a standard definition of “bariatric surgery” using the same methodology as [Healthcare Resource Groups \(HRGs\)](#) . The new HRGs were created in 2011/12 Reference Costs collection as a result of work between the National Casemix Office at the Health and Social Care Information Centre, the British Obesity and Metabolic Surgery Society (BOMSS) and the Chapter F Digestive System Expert Working Group (EWG).

This results in the data source remaining the same (Hospital Episode Statistics (HES) data held at the Health and Social Care Information Centre) and the continued use of the number of Finished Consultant Episodes (FCEs) for bariatric surgery where the primary diagnosis was obesity (ICD-10 code E66). The list of OPCS 4.6 codes used to define the main or secondary procedure, however, has been amended (the old and new lists of OPCS codes are shown below).

This definitional change has a negligible effect on the back data; between 20 and 30 cases a year from 2009/10 onwards when OPCS 4.5 and 4.6 codes were used, following on from the introduction of a specific code for maintenance of gastric band in OPCS-4.5 in 2009/10.

The table on the next page shows how the coding has changed over time.

A * indicates that this code was included for that year.

¹ [NS] denotes that the publication has National Statistics status
